SUMMARY OF CHANGES

Revision History

Date	Version	Revision
4/1/2017	1	Release of 2017 for Vendors
5/22/2017	1.1	Data Element Structure - Annual Assessment – dates clarified to reflect the anniversary date of the head of household. 2.5 Method for Tracking ES – removed requirement for PATH collection P4 Connection with Soar – required for VA: SSVF all components R17 Project Completion Status - required collection for BCP-Prevention also R18 Counseling - typographic errors corrected VA Program Collection Requirements – correct project typing, corrected element visibility requirements V1 Veterans Information - required for GPD and HCHV also V7 SSVF HP Targeting Criteria – removed requirement for HUD-VASH
6/2/2017	1.2	2.7 Bed and Unit Inventory –Emergency Shelter bed type fields and responses modified to align with AHAR and HIC requirements. R13 Family Critical Issues – removed requirement to map data

HMIS DATA DICTIONARY OVERVIEW

Introduction

A Homeless Management Information System (HMIS) is the information system designated by a local Continuum of Care (CoC) to comply with the requirements of CoC Program interim rule 24 CFR 578. It is a locally-administered data system used to record and analyze client, service, and housing data for individuals and families who are homeless or at risk of homelessness

HMIS is administered by the U.S. Department of Housing and Urban Development (HUD) through the Office of Special Needs Assistance Programs (SNAPS) as its comprehensive data response to its congressional mandate to report to Congress on national homelessness. It is used by all projects that target services to persons experiencing homelessness within SNAPS and the office of HIV-AIDS Housing. It is also used by the other federal partners from the U.S. Department of Health and Human Services (HHS) and the U.S. Department of Veterans Affairs and their respective programs to measure project performance, report to congress, and participate in benchmarking of the national effort to end homelessness.

The HMIS Data Standards were first published by HUD in 2004 as the [HMIS Data and Technical Standards](#). This 2004 document served as the foundation for software developers in constructing HMIS applications. In March 2010, HUD updated the Data Standards ([March 2010 HMIS Data Standards](#)), primarily to reflect data collection requirements for the Homelessness Prevention and Rapid Rehousing Program (HPRP). HUD, in collaboration with its federal partners, updated the HMIS Data Standards again in 2014 with the release of the 2014 HMIS [Data Dictionary](#) and [Data Manual](#). Both documents supersede the previously released HMIS Data Standards. **The release of this 2017 HMIS Data Dictionary and its companion Data**

Standards Manual, are the documentation of requirements for the programming and use of all HMIS systems and comparable database systems,¹ effective October 1, 2017.

An HMIS software must be able to collect all the data elements defined within this HMIS Data Dictionary, support the system logic, including dependencies, identified in this document, and ensure that the data collection and the visibility of data elements is appropriate to the project type and federal funding source for any given project.

Communities may elect to add data elements or maintain historical data element collection beyond what is specified in this Data Dictionary as long as it does not impact the ability of the CoC to accurately collect and report on the required data elements. In these cases, HMIS Leads should work directly with their HMIS vendors to meet their individual needs.

HMIS RELATED DOCUMENTS

There are a variety of documents that comprise the suite of HMIS Data Standard resources. Each of the documents has a specific purpose and intended audience. The HMIS Lead should be familiar with all of the documents and collectively use them as their HMIS reference materials along with specific materials provided by the software vendor.

HMIS Data Standard Documents

The Data Standard Dictionary and Manual contain the foundations for the data contained within an HMIS. The Project Descriptor Data Element Manual builds upon information in the Data Dictionary to provide further information for an HMIS Lead's on the elements required by all projects for set up in the HMIS.

Manual Name & Link	Intended Audience	Contents
<u>HMIS Data Standards Dictionary</u>	HMIS Vendors & HMIS Lead Agencies	The manual provides the detailed information required for system programming on all HMIS element and response required to be included in HMIS software. It delineates data collection requirements, system logic, and contains the XML and CSV tables and numbers.
		The manual also includes critical information about data collection stages, federal partner data collection required elements, and metadata data elements.
<u>HMIS Data Standards Manual</u>	HMIS Lead Agencies & HMIS Users	The manual provides a review of all of the Universal Data Elements and Program Descriptor Data Elements. It contains information on data collection requirements, instructions for data collection, and descriptions that the HMIS User will find as a reference.
<u>HMIS Project Descriptor Data Elements Manual</u>	HMIS Lead Agencies	The Project Descriptor Manual is designed to provide specific information about the Project Descriptors required to be set-up in the HMIS by the HMIS Lead Agency.

¹ Comparable databases are required for use by providers of services for victims of domestic violence, as described in the VAWA.

HMIS Federal Partner Program Manuals

These manuals contain specific and detailed information on project set up for each of the federal partners participating in HMIS including: HMIS project typing, the specific data elements required for collection, program specific meanings and definitions, and key information that the federal partner has identified as required for their program. Each Manual was created jointly by HUD and the federal partner, and approved by both entities prior to publishing.

Manual Name & Link	Intended Audience	Federal Partner	Contents
CoC Program HMIS Manual	<ul style="list-style-type: none"> • HMIS Lead Agencies • HMIS Users • Grantees 	U.S. Department of Housing and Urban Development – Office of Special Needs Assistance Programs CoC Program information link	The manual assists in project set up of all Continuum of Care (CoC) Program component projects: Transitional Housing, Permanent Supportive Housing, Rapid Re-Housing, and Services Only. Information aligns with the CoC Program Interim Rule .
ESG Program HMIS Manual	<ul style="list-style-type: none"> • HMIS Lead Agencies • HMIS Users • Recipients • Subrecipients 	U.S. Department of Housing and Urban Development – Office of Special Needs Assistance Programs ESG Program information link	The manual assists in project set up of all Emergency Solution Grant (ESG) Program component projects: Emergency Shelter (night by night and entry/exit), Street Outreach, Rapid Re- Housing and Homelessness Prevention. Information aligns with the ESG Program Interim Rule
HOPWA Program HMIS Manual	<ul style="list-style-type: none"> • HMIS Lead Agencies • HMIS Users • Grantees 	U.S. Department of Housing and Urban Development – Office of HIV/AIDS Housing HOPWA Program information link	The manual assists in project set up of all of the Housing Opportunities for Persons with AIDS (HOPWA) program components.

ABOUT THIS DICTIONARY

HMIS Concepts and Terms

Continuum of Care (CoC) is used multiple ways:

1. Continuum of Care and Continuum means the group organized to carry out the responsibilities required under the [CoC Program Interim Rule](#) (24 CFR Part 578) and comprises representatives of organizations, including nonprofit homeless providers, victim service providers, faith-based organizations, governments, businesses, advocates, public housing agencies, school districts, social service providers, mental health agencies, hospitals, universities, affordable housing developers, and law enforcement, and organizations that serve homeless and formerly homeless persons to the extent that these groups are represented within the geographic area and are available to participate.
2. CoC Program refers to the federal funding source which provides housing and/or service grant dollars.
3. Continuum Project refers to a distinct unit of an organization, which may or may not be funded by HUD or the federal partners, that provides services and/or lodging for the homeless and is identified by the Continuum as part of its service system. [Note: a project funded by the HUD's CoC Program may be referred to then as a "CoC Program-funded continuum project".]

HMIS User means the individual who uses or enters data in an HMIS or a comparable database approved by the CoC.

HMIS Lead means the entity designated by the Continuum of Care in accordance with the [HMIS Proposed Rule](#)² (24 CFR Part 580) to operate the Continuum's HMIS on the Continuum's behalf.

HMIS System Administrator means the individual(s) whose job it is to manage the HMIS implementation at the local level: enrolling programs and managing appropriate use, supporting users through connection to, or direct provision of, user training, and overseeing system setup.

² As of June, 2016 the HMIS Rule is not in effect. When HUD publishing the final HMIS Rule communities will be given time to come into compliance with the rule.

Data Element Structure

Every data element required by HUD and the Federal partners to be stored within an HMIS is specified in this document. The following format is used to describe each data element:

Header	Instruction
Element Name	The name of the element.
Field # & Response(s)	<p>The field name and any response options associated with the field.</p> <p>Most elements contain responses of “client doesn’t know” and “client refused”. Data not collected continues to be identified as a response option in this HMIS Data Dictionary. It is not a response option necessary in every system or in every element. The element is required for use by any HMIS system which requires a response to an element before allowing the user to move forward in the system. Adding the response option of “data not collected” enables a user who did not collect or simply does not have the information to enter a response that does not present a false answer. HMIS systems which require entry of any element for the system to progress must implement the “data not collected” response for all elements that require a response. [System Note: data not collected will equate to missing data or null values as appropriate for transfer and reporting purposes.]</p>
Dependent to Field # & Response #	<p>Dependent fields and dependent response options identify the Field and Response option to which they are dependent.</p> <p>The dependencies outlined in the Data Dictionary are expected to be visible to users on-screen. The methods vendors may elect to make dependencies visible/invisible; colored for completion/shaded out; etc. are up to each software developer.</p>
Element Type	<p>The type of data element (project descriptor, universal, program-specific or metadata) which indicates the level at which data are collected, whether they apply to all funding sources, and their relationship to other data.</p> <ol style="list-style-type: none"> 1. Project Descriptor Data Elements (PDDE) are the required elements that define the individual projects within the HMIS system. They are initially entered at the setup of each project within an HMIS. They must be updated by the HMIS Administrator on a regular basis as information within the elements are subject to change and are critical for report generation. 2. Universal Data Elements (UDE) are client level data elements required for collection by all projects participating in HMIS, regardless of project type or funding source. 3. Program-Specific Data Elements are client level elements required by a specific federal program or program component. <ul style="list-style-type: none"> • Common Elements (CE) are the first subset of the program-specific data elements that are required for collection by most of the federal partners. When combined with the UDEs, these elements comprise the building blocks for much of the reporting generated by an HMIS. • Individual Federal Partner Program Elements are the second subset of the program-specific data elements. These elements are listed under the federal partner program which maintains the element. There are elements maintained by one partner and shared with one other. When combined with UDE’s and Common Elements these elements comprise specific project level reporting generated by an HMIS. 4. Metadata Elements are system generated data about data elements documenting required metadata collection for all of the above element types.

Header	Instruction
Funder: Program-Component	Identifies the federal department, the program, and the program component which requires the collection of the element.
Project Type Applicability	Project type(s) refers to element 2.4 <i>Project Type</i> and identifies the HMIS project type required to collect and report the data element.
Data Collected About	<p>Identifies the universe of client(s) for whom an element response is required (e.g. All Clients, Heads of Household, Adults, etc.). Data may be collected about a wide group (e.g. all household members) but may be further limited in data reporting specifications.</p> <p>Please note: all unaccompanied youth are their own Head of Household. The term “unaccompanied youth” has been removed from the Data Dictionary as it was redundant and confusing at times. There are occasions where one or more youth present together at project start. In these instances, each youth should be in their own household and therefore will be their own head of household.</p>
Collection Point	<p>The point(s) at which the data must be able to be collected in an HMIS. For data elements with multiple collection points (e.g. Project Start, Occurrence Point, Project Exit), each record must be stored with the appropriate <i>Data Collection Stage</i> (as listed in metadata element 5.3). Data elements with only a single collection point need not be stored with any particular data collection stage, since their data collection point is inherent in their requirements.</p> <p>Record creation – Indicates the element is required to be collected when the client record is created. Elements collected at record creation should have one and only one value for each client in an HMIS. Data are collected and entered into the HMIS, responses must be reviewed for accuracy at each project start and edited as necessary to make corrections or to improve data quality.</p> <p>Project start (stored with Data Collection Stage of “Project Start” for elements with multiple collection points) – Indicates the element is required to be collected at every project start. Elements collected at project start must have an <i>Information Date</i> that matches the client’s <i>Project Start Date</i>. Information must be accurate as of the <i>Project Start Date</i>. When a data element with multiple collection points is collected at project start, it must be stored with a <i>Data Collection Stage</i> of ‘project start.’ There should be one and only one record with a <i>Data Collection Stage</i> of ‘project start’ for each relevant data element for any given project start. Data may be edited by users associated with the project to correct errors or omissions; such edits will not change the data collection stage associated with the record.</p> <p>Occurrence Point/Update – Indicates the element may be collected and entered at any point during a project stay to track changes over time or document the occurrence of events (e.g. a service is provided). These types of records must be able to be entered at any point during the project stay. Some data elements are collected once per project stay. For others, the system must be able to support a theoretically unlimited number of records per project stay, each with a distinct <i>Information Date</i>. The <i>Information Date</i> should reflect the date on which the information is collected and/or the date for which the information is relevant for reporting purposes. Information must be accurate as of the <i>Information Date</i>, regardless of when it is collected or entered into the HMIS. Data may be edited by users associated with the project to correct errors or omissions; such edits will change neither the data collection stage nor the information date unless it is explicitly altered by the user.</p>

Header	Instruction
	<p>Annual assessment (stored with Data Collection Stage of “Annual Assessment”) – Data elements required for collection at annual assessment must be entered with an <i>Information Date</i> of no more than 30 days before or after the anniversary of the head of household’s <i>Project Start Date</i>, regardless of the date of the most recent ‘update’ or any other ‘annual assessment’. Information must be accurate as of the <i>Information Date</i>. The data collection stage may not be inferred from the Information Date, although the field must have an <i>Information Date</i> recorded with it. To be considered reportable to HUD as an annual assessment, data must be stored with a <i>Data Collection Stage</i> of ‘annual assessment’. The Annual Assessment must include updating both the head of household’s record and any other family members at the same time.</p> <p>There should be one and only one record for each data element annually with a <i>Data Collection Stage</i> recorded as ‘annual assessment’ associated with any given client and <i>Enrollment ID</i> within the 60-day period surrounding the anniversary of the head of household’s <i>Project Start Date</i>. Regardless of whether the responses have changed since project start or the previous annual assessment, a new record must be created for each subsequent annual assessment such that it is possible to view a history, by date, of the values for each data element. Data may be edited by users associated with the project to correct errors or omissions; such edits will change neither the data collection stage nor the information date unless they are explicitly altered by the user.</p> <p>Project exit (stored with Data Collection Stage of “Project Exit” for elements with multiple collection points) – Indicates the element is required to be collected at every project exit. Elements collected at project exit must have an <i>Information Date</i> that matches the client’s <i>Project Exit Date</i>. Information must be accurate as of the <i>Project Exit Date</i>. When a data element with multiple collection points is collected at project exit, it must be stored with a <i>Data Collection Stage</i> of ‘project exit.’ There should be one and only one record with a <i>Data Collection Stage</i> of ‘project exit’ for each relevant data element for any given project exit. Data may be edited by users associated with the project to correct errors or omissions; such edits will not change the data collection stage or the information.</p> <p>Post exit (stored with Data Collection Stage of “Post Exit” for elements with multiple collection points) – Indicates the element may be collected after project exit for a period of no longer than six months. This is a new data collection stage in 2017 and its functionality and impact on reporting will be assessed prior to the next data standards update.</p>
System Logic	Logically required data collection or system structure information for HMIS software development purposes.
Other System Issues	Information on rationale, conditions, constraints, etc. that may be applicable to a specific element and are important for HMIS software development purposes.
XML	XML element in XML Specifications where the data standard element is located.
CSV	Primary file in CSV Specifications where the data standard element is located.
2017 V1 Changes Made	Documentation of changes to the element from the 2014 Data Dictionary Version 5 to the 2017 Data Dictionary.

PROJECT DESCRIPTOR DATA ELEMENTS

Project descriptor data elements are intended to identify the organization, specific project, and project details to which an individual client record in an HMIS is associated. The project descriptors are generally managed in an HMIS by a system administrator, not a user. They are created at initial new project setup within the HMIS and are intended to be updated, as needed, on a regular basis by the system administrator, no less than once annually. If data within project descriptor data elements can be entered or updated by a user, then the HMIS system administrator must have oversight and review ability.

This section describes the data to be recorded in HMIS for each project descriptor data element and its relation to each project entering data. The project descriptor data elements create a basis for identifying the organization, project, project type, and federal partner Funder(s). Correct use of the 2.4 Project Type and 2.6 Funding Sources data elements will help assure that projects are identified for correct visibility and are able to generate reports required for each of the federal partners as reporting parameters will be based off of one or both of these elements. This year, HUD has re-implemented the requirement that the CoC must collect program information in the HMIS on all continuum projects within its jurisdiction, regardless of whether the program participates in the HMIS (last required in the 2010 data standards). This is to facilitate AHAR participation.

The following Project Descriptor Data Elements are required for project setup in HMIS:

- 2.1 [Organization Identifiers](#)
- 2.2 [Project Identifiers](#)
- 2.3 [Continuum of Care Code](#)
- 2.4 [Project Type](#)
- 2.5 [Method for Tracking Emergency Shelter Utilization](#)
- 2.6 [Federal Partner Funding Sources](#)
- 2.7 [Bed and Unit Inventory Information](#)
- 2.8 [Additional Project Information](#)

2.1 Organization Identifiers

Header	Instruction
Element Name	Organization Identifiers
Field 1 & Response	Organization ID – auto generate
Field 2 & Response	Organization Name
Element Type	Project Descriptor
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Organizations
Collection Point	Initial HMIS project setup, reviewed/updated no less than annually
System Logic	An Organization ID must be assigned to each project via a system generated number or code. Each organization must receive a distinct identifier that is consistently associated with that organization.

Header	Instruction
	Each organization must also be able to be associated with one or more projects. The name of the organization must be captured in text within the HMIS.
Other System Issues	An HMIS must allow the HMIS Lead to activate and deactivate an organization. An HMIS application may permit the creation of a common name field more familiar to users for use within the application while retaining the legal name for use in reporting.
XML	<Organization>
CSV	Organization
2017 V1 Changes Made	None

2.2 Project Identifiers

Header	Instruction
Element Name	Project Identifiers
Field 1 & Response	Project ID – auto generate
Field 2 & Response	Project Name
Field 3 & Response	Operating Start Date
Field 4 & Response	Operating End Date
Element Type	Project Descriptor
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Projects
Collection Point	Initial HMIS project setup, reviewed/updated no less than annually
System Logic	A Project ID must be assigned to each project via a system generated number or code. Each project must receive an identifier that is unique within the HMIS and consistently associated with that project. Each project must be associated with an organization (data element 2.1); separate projects operated by the same agency must be associated with the same Organization ID. The name of the project must be captured in text within the HMIS. Residential projects that operate in multiple CoCs that cross HMIS systems must be documented in each CoC's HMIS, even in cases where all client data are entered into a single CoC's HMIS. Operating start date should reflect the first day on which a project provided (or will provide) services and/or housing. For projects that began operating prior to October 1, 2012, the start date may be estimated if it is not known. Projects that are fully funded but have not yet begun operating may be entered with future project start date that reflects the date the project will begin providing services. Operating end date should reflect the last day on which the project provided or is expected to provide services and/or housing. It may be a date in the future; it may also be blank if the project is expected to continue operating indefinitely.

Header	Instruction
Other System Issues	An HMIS application may permit the creation of a common name element more familiar to users for use within the application while retaining the legal name for use in reporting.
XML	<Project>
CSV	Project
2017 V1 Changes Made	Two new fields were added (Operating Start Date and Operating End Date) to enable activation and de-activation of a project. Clarification to System Logic also provided due to questions received by HUD.

2.3 Continuum of Care Code

Header	Instruction
Element Name	Continuum of Care Code
Field 1 & Response	Continuum Code - HUD-assigned CoC codes for the project location [text – 6 characters]
Element Type	Project Descriptor
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Continuum Projects
Collection Point	Initial HMIS project setup, reviewed/updated no less than annually
System Logic	<p>Collect at initial setup. There is a many-to-one relationship between this data element and 2.2 Project Identifiers; there may be multiple current records of this data element at any given time. Add, edit, or remove associations with CoCs as needed to reflect changes.</p> <p>Projects may be funded to operate in one or more CoCs. The system must allow for a project to be associated with every continuum of care in which the project operates, although only the CoC Codes for which the project will be entering data into the HMIS must be recorded.</p>
Other System Issues	<p>Projects may be funded to provide for housing and/or services to clients residing in only one CoC (e.g. CoC: Transitional Housing), or they may be funded for housing and/or services across multiple CoCs (e.g. VA: SSVF). The system must allow for multiple codes selected per project.</p> <p>It must be possible to associate a project with the CoC code for every geographic area in which the project operates and for which it will be entering data into the HMIS.</p> <p>If the HMIS produces CoC-level reporting on 2.7 Bed and Unit Inventory (AHAR and/or HIC) for more than one continuum, records of inventory must be separate and associated with the CoC where the inventory is located.</p> <p>If the system sets a default value for the CoC Code, it should be the CoC code for the continuum operating the HMIS.</p> <p>For data quality purposes, HUD strongly encourages that CoC Codes in this data element be used to populate an option list of CoC Codes for data element 3.16 Client Location.</p>
XML	<ProjectCoC>
CSV	ProjectCoC
2017 V1 Changes Made	Updated guidance instructing systems to allow for multiple CoC codes to be selected per project.

2.4 Project Type

Header	Instruction
Element Name	Project Type
Field 1 & Responses	Continuum Project
0	No
1	Yes
Field 2 & Responses	Project Type
1	Emergency Shelter
2	Transitional Housing
3	PH - Permanent Supportive Housing (disability required for entry)
4	Street Outreach
5	RETIRED
6	Services Only
7	Other
8	Safe Haven
9	PH – Housing Only
10	PH – Housing with Services (no disability required for entry)
11	Day Shelter
12	Homelessness Prevention
13	PH - Rapid Re-Housing
14	Coordinated Assessment
Dependent A – Dependent to Field 2 & Response 6	<i>If Services Only for “Project Type”</i> Affiliated with a residential project
0	No
1	Yes
Dependent B – Dependent to Dependent A & Response 1	<i>If Yes for “Affiliated with a residential project”</i> Project ID(s) of residential project(s) affiliated with SSO
Element Type	Project Descriptor
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Continuum Projects
Collection Point	Initial HMIS project setup, reviewed/updated no less than annually
System Logic	<p>Collect once at initial setup. System stores collected project type and retains for historical purposes. Allow edits if changes or corrections for data entry error.</p> <p>A project can only have one project type assigned; there is a one-to-one relationship between this data element and data element 2.1 Project Identifiers.</p> <p>A project must be able to identify multiple affiliated residential projects if “yes” to Dependent A.</p>
Other System Issues	A continuum project refers to all projects within the Continuum of Care that provide housing and/or services for homeless persons. A Continuum project is

Header	Instruction
	<p>not limited to those projects funded by HUD and should include all the federal partner projects and all other federally or non-federally funded projects functioning within the Continuum.</p> <p>General rules of project typing:</p> <ol style="list-style-type: none"> 1. A project is to be assigned a type based on the lodging or service it is providing. 2. If an organization operates more than one residential project type, each type must be set up in HMIS as a separate project. (For example, an emergency shelter and a transitional housing project must be set up as two separate projects in HMIS, even if they are funded by the same source). 3. A residential project that is funded under one or more separate grants to provide supportive services to 100% of clients of the residential project, may be set up as a single project with the appropriate residential project type. All federal funding sources must be identified in <i>2.6 Federal Partner Funding Sources</i>. 4. A project that provides street outreach must be typed “4 – Street Outreach”. (Note: a street outreach project that also has a direct service component serving persons other than people living on the streets or in a place not meant for human habitation will require two separate projects to be set up in an HMIS – a “4- Street Outreach” and a “6- Services Only”). 5. A project that provides only services (other than street outreach), has associated housing outcomes, and is not limited to serving clients of one or more specific residential project should be typed as “6 – Services Only” and <i>Affiliated with a Residential Project</i> will be “No.” 6. A project that provides only services (other than street outreach), has associated housing outcomes, and is restricted by its grant agreement to serve only clients of one or more specific residential projects should be typed as “6 – Services Only” and <i>Affiliated with a Residential Project</i> will be “Yes.” Each of the residential projects with which the services only project is associated must be identified. 7. A project that provides only services (other than street outreach) that are “stand alone supportive services” and have no associated housing outcomes should be typed as “7 – Other.” (For example, a project funded to provide child care for persons in permanent housing or a dental care project funded to serve homeless clients should be typed “7 – Other.” A project funded to provide ongoing case management should be typed “6 – Services Only.”) <p>Project Type guidance is also available in the individual HMIS Program Handbooks (ESG, CoC, HOPWA, RHY, PATH, VA).</p> <p>Note: Projects which only provide services and are funded under the HUD CoC Program after FY 2014 which provide services exclusively to clients of a single residential project type (other than emergency shelter) will be identified in <i>2.6</i></p>

Header	Instruction
	<p><i>Federal Partner Funding Sources</i> with the component type of the residential project(s) and not “Services Only”. These projects must still be classified with a Project Type of “Services Only.”</p> <p>For the sake of consistency, it is recommended that Dependent B is selected from a drop down list created from element 2.2 Project Identifiers that includes the Project Names and IDs for all non-emergency shelter projects.</p>

2017 V1 Changes Made	None

2.5 Method for Tracking Emergency Shelter Utilization

Header	Instruction
Element Name	Method for Tracking Emergency Shelter Utilization
Field 1 & Responses	<p>Emergency Shelter Tracking Method</p> <p>0 Entry/Exit Date (e/e)</p> <p>3 Night-by-Night (nbn)</p>
Element Type	Project Descriptor
Funder: Program-Component	<p>HUD:CoC – No component requires data collection</p> <p>HUD:ESG – Collection required for all ES components</p> <p>HUD:HOPWA – Collection required for Hotel/Motel ES e/e components</p> <p>HUD:HUD-VASH - No component requires data collection</p> <p>HUD:RHSAP - No component requires data collection</p> <p>HHS: RHY - Collection required for BCP – ES e/e components</p> <p>VA:SSVF – No component requires data collection</p>
Project Type Applicability	1: Emergency Shelter
Data Collected About	All Emergency Shelters
Collection Point	Initial HMIS project setup, reviewed/updated no less than annually
System Logic	Collect at initial setup. System stores collected method and retains for historical purposes. There is a one-to-one relationship between this data element and 2.2 Project Identifiers.
Other System Issues	<p>One method must be identified in an HMIS for each emergency shelter project. Reporting and outcomes will differ depending on the method utilized by the shelter.</p> <p>The entry/exit method should be used for all shelters which require an entry, a continuous stay, and an exit. The length of stay will be calculated based on the number of nights between project start and project exit and performance measurement will include changes from project start and project exit data collection stages. Funder preference for emergency shelter projects is the use of the project start/exit date method except for projects where clients are permitted to enter and exit on an irregular basis (e.g. mass shelter).</p> <p>The night-by-night method should be used for shelters which allow clients to enter and exit on an irregular basis and do not require a continuous stay and</p>

Header	Instruction
	<p>must instead rely on a method of tracking “bed nights”. In this method (1) all data required to be collected at project start is collected the first time the client stays at the shelter; (2) the project records every discrete date (or series of dates) that the client utilizes a bed; (3) the system maintains historical data on the nights sheltered; (4) for reporting purposes, a client’s length of stay in the project will be based on the actual number of bed nights and not on the period of time from entry to exit; and (5) the client may be exited or the system may be designed to automatically generate an exit after an extended absence.</p> <p>The method used is important for the indication of length of stay in projects. Only projects utilizing a project start/exit date comparison will be able to report on a continuous length of stay.</p> <p>Utilization of the night-by-night method does not mean that an HMIS must identify a client in a specific bed. If the HMIS supports a custom module that identifies clients in a bed that module may continue to be used. However, use of that module does not necessarily equate with the new night-by-night model.</p>
XML	<Project><TrackingMethod>
CSV	Project
2017 V1 Changes Made	<i>Clarifications to System Logic regarding relationships between data elements; no change is intended, but updates will be required in systems not consistent with this logic.</i>

2.6 Federal Partner Funding Sources

Header	Instruction
Element Name	Federal Partner Funding Sources
Field 1 & Responses	<p>Federal Partner Program and Components</p> <p>1 HUD:CoC – Homelessness Prevention (High Performing Comm. Only)</p> <p>2 HUD:CoC – Permanent Supportive Housing</p> <p>3 HUD:CoC – Rapid Re-Housing</p> <p>4 HUD:CoC – Supportive Services Only</p> <p>5 HUD:CoC – Transitional Housing</p> <p>6 HUD:CoC – Safe Haven</p> <p>7 HUD:CoC – Single Room Occupancy (SRO)</p> <p>43 HUD:CoC - Youth Homeless Demonstration Program (YHDP)</p> <p>8 HUD:ESG – Emergency Shelter (operating and/or essential services)</p> <p>9 HUD:ESG – Homelessness Prevention</p> <p>10 HUD:ESG – Rapid Rehousing</p> <p>11 HUD:ESG – Street Outreach</p> <p>35 HUD: Pay for Success</p> <p>36 HUD: Public and Indian Housing (PIH) Programs</p> <p>12 HUD:Rural Housing Stability Assistance Program</p> <p>13 HUD:HOPWA – Hotel/Motel Vouchers</p>

Field 2 & Response	Grant Identifier
Field 3 & Response	Grant Start Date ([date field])
Field 4 & Response	Grant End Date ([date field])
Element Type	Project Descriptor
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Projects
Collection Point	Initial HMIS project setup, reviewed/updated no less than annually
System Logic	Collect at initial setup. This is a transactional data element; a single project may have multiple current and historical records. Allow corrections for data entry error. An HMIS must allow projects with multiple Funder sources and multiple grants (with potentially different grant terms) from the same funding source to record and store all funding sources for the project.
Other System Issues	The federal funding sources listed in Field 1 & Response are the federal partner programs and their project components who have agreed either to participate in HMIS or are otherwise considered continuum projects. An HMIS may elect to identify other funding sources as may be appropriate to the CoC, but must

Header	Instruction
	<p>have available the identification of all the sources identified in Field 1 & Response.</p> <p>A grant identifier is to be assigned to each federal program being used for funding for the project. The grant identifier may be the grant number or any other identification system utilized by the CoC.</p> <p>All sub-grantees of a principal grant should use the same grant identifier as the principal grantee as a method of allowing for aggregated reporting by the principal grantee.</p>
XML	<Funder>
CSV	Funder
2017 V1 Changes Made	<p>Addition of response option 35 PIH and 36 PFS.</p> <p>Retired responses 28 VA Community Contract Residential Treatment Program and 31 VA: Grant Per Diem response and replaced it the six new GPD component types (response 37-42)</p> <p>Renamed response 27 from Community Contract Emergency Housing to VA: CRS Contract Residential Services (which now includes both the former Community Contract Emergency Housing and Residential Treatment Programs)</p>
Element Footnotes	***These VA programs are not required to enter client-level data although Project Descriptor Data Elements must be recorded.

2.7 Bed and Unit Inventory

Header	Instruction
Element Name	Bed and Unit Inventory Information
Field 1 & Response	Information date
Field 2 & Response	Inventory start date (date)
Field 3 & Response	Inventory end date (date)
Field 4 & Response	CoC Code
Field 5 & Responses	Household type
1	Households without children
3	Households with at least one adult and one child
4	Households with only children
Field 6 & Response	Bed inventory (integer)
Field 7 & Response	Unit inventory (integer)
Field 8 & Responses	If 2.7 Project Type = 'Emergency shelter' Bed Type
1	Facility-based beds
2	Voucher beds
3	Other beds

Header	Instruction
Field 9 & Responses	<i>If 2.7 Project Type = 'Emergency shelter' – Availability</i>
1	Year-round
2	Seasonal
3	Overflow
Field 10 & Response	Veteran bed inventory (integer)
Field 11 & Response	Youth bed inventory (integer)
Field 12 & Response	<i>If 2.7 Project Type = 'PH – Permanent supportive housing' – Chronically homeless bed inventory (integer)</i>
Field 13 & Response	HMIS participating beds (integer)
Element Type	Project Descriptor
Funder: Program-Component	All Programs – All Components
Project Type Applicability	1: Emergency Shelter 2: Transitional Housing 3: PH- Permanent Supportive Housing 8: Safe Haven 9: PH- Housing Only 10: PH- Housing with Services 13: PH- Rapid Re-Housing
Data Collected About	All Residential Projects
Collection Point	Initial HMIS project setup, reviewed at least annually and updated as needed to reflect changes.
System Logic	A project may have multiple current and historical records of inventory. Inventory for RRH projects should be counted and recorded consistent with HIC guidance to reflect the numbers of RRH participants who have moved into permanent housing. Projects that serve more than one household type must have a separate inventory record for each household type. Emergency shelters with more than one bed availability (year-round, seasonal, overflow) or more than one bed type (facility-based, voucher, other) must have separate records for each bed availability, bed type, and household type. New inventory – any inventory added since the date of the last HIC – should be recorded in a separate record, as should inventory under development (i.e., fully funded but not yet available). Changes over time should be documented such that a historical record of inventory is retained. Minor day-to-day fluctuations need not be recorded, but differences due to significant changes in project operations should be entered as they occur. Where there are multiple records for a single project for the same household type (and, for emergency shelters, the same bed availability), the record with the most recent Information Date should be considered current as of a single date or within any given date range. For any inventory record, it must be possible to identify the CoC with which the inventory is associated.

Header	Instruction
	<p>When a project adds inventory, a new record should be added with an Information Date and Inventory Start Date that reflect the date of the increase.</p> <p>Inventory under development (i.e., beds for which funding has been approved but are not yet available) should also be separate using the current date as the Information Date and the date that the beds are expected to be available as the Inventory Start Date.</p> <p>When a project reduces inventory, but will continue to serve the same household type with a smaller number of beds, a new record should be added with an Information Date of the effective date of the decrease; the same Inventory Start Date from the previous record should be used. The earlier record should be closed out by recording an Inventory End Date that is the day prior to the effective date of the decrease.</p> <p>When a project is eliminating all inventory for a given household type, an Inventory End Date reflecting the last date on which beds were available should be entered for the existing record.</p> <p>Changes in the number of HMIS participating beds; the number of beds dedicated for chronically homeless, Veteran, or youth clients should be documented by closing out the old record with an Inventory End Date that is the date before the effective date of the change. A new record should be created with an Information Date that is the effective date of the change; the same Inventory Start Date from the previous record should be used.</p> <p>At annual review, if there are separate records for beds of the same type and all Inventory Start Dates are more than one year prior to the most recent HIC, the individual records should be closed out by recording an Inventory End Date that is the day prior to the current date. A new record should be created to combine the total inventory of the individual records using the current date as the Information Date and the earliest Inventory Start Date from the individual records.</p>
Other System Issues	These fields must be transactional, meaning they must be able to record multiple values over time.
XML	<Inventory>
CSV	Inventory
2017 V1 Changes Made	CoC Code has been added to clarify that inventory is specific to the continuum in which it is located; for projects that operate in multiple CoCs, it must be possible to count inventory separately for each. Data element has been updated to correspond with AHAR and HIC requirements; system logic has been updated to clarify data entry requirements. Inventory Start Date and Inventory End Date, previously optional, are required. Specific age categories for youth beds have been removed as they are no longer a part of the HIC.

2.8 Additional Project Information

Header	Instruction
Element Name	Additional Project Information

Header	Instruction
Field 1 & Response	Information date
Field 2 & Response	CoC Code
Field 3 & Response	Geocode (6 digits)
Field 4 & Responses	Target Population
1	DV: Domestic violence victims
3	HIV: Persons with HIV/AIDS
4	NA: Not applicable
Field 5 & Responses	Victim services provider
0	No
1	Yes
Field 6 & Response	Project ZIP code (5 digits)
Field 7 & Responses	<i>From look up table provided by HUD – code the following geography types based on ZIP code</i>
1	Urban
2	Suburban
3	Rural
Field 8 & Responses	Housing type
1	Site-based – single site
2	Site-based – clustered / multiple sites
3	Tenant-based - scattered site
Field 9 & Responses	Project street address 1 (text)
Field 10 & Responses	Project street address 2 (text)
Field 11 & Responses	Project city (text)
Field 12 & Responses	Project state (2 letters)
Element Type	Project Descriptor
Funder: Program-Component	All Programs – All Components
Project Type Applicability	1: Emergency Shelter 2: Transitional Housing 3: PH- Permanent Supportive Housing 8: Safe Haven 9: PH- Housing Only 10: PH- Housing with Services 13: PH- Rapid Re-Housing
Data Collected About	All Projects
Collection Point	Initial HMIS project setup, reviewed at least annually and updated as needed to reflect changes.
System Logic	Collect at initial setup. For projects that operate in a single continuum, there is a many-to-one relationship between this data element and 2.1 Project Identifiers, although at any given time, only one record for this data element will be

Header	Instruction
	<p>current. For projects that operate in multiple CoCs, there is a similar many-to-one relationship with 2.3 Continuum of Care Code. Information must be confirmed at least annually. Data entry errors should be edited to correct; a new record should be created to document a change in information. A new record is only required if a change has occurred; the Information Date of the new record should reflect the date of the change.</p> <p>Not all fields are required for all projects; it should be possible to leave all address fields blank.</p>
Other System Issues	<p>Geocode, ZIP code, and address fields should reflect the location of the project's principal site or, for multiple site projects, the location in which the majority of the project's clients are housed. Tenant-based scattered site projects are only required to complete the geocode and ZIP code fields and may use the administrative address if they wish to complete the remainder of the address fields.</p> <p>HUD will release a crosswalk of ZIP codes with a geography type for each. This must be incorporated as a table into HMIS applications and used to auto-populate the geography type field. The crosswalk will not be available immediately but will be required for use in the AHAR; until it is available, the geography type field should be left blank.</p>
XML	<Geography>
CSV	Geography
2017 V1 Changes Made	Relevant fields from 2.8 Site Information and 2.9 Target Population have been combined in a single data element. "Optional status was removed from the element" as it is required for the AHAR. The data element must be available for use by CoCs in all HMIS applications by October 1, 2017. CoCs that use HMIS to produce the HIC must complete data entry for all projects prior to HIC submission; CoCs that participate in the AHAR must complete data entry for all projects no later than October 1, 2018.

UNIVERSAL DATA ELEMENTS

HMIS Universal Data Elements are elements required to be collected by all projects using the software as an HMIS. Projects funded by any one or more of the federal partners must collect the Universal Data Elements, as do projects that are not funded by any federal partner (e.g. missions) but are entering data as part of the Continuum of Care's HMIS implementation.

Universal data elements enable the HMIS the ability to record unique, unduplicated client records, establish participation in a project within a date range, and identify clients who meet time criteria for chronic homelessness.

- 3.1 [Name](#)
- 3.2 [Social Security Number](#)
- 3.3 [Date of Birth](#)
- 3.4 [Race](#)
- 3.5 [Ethnicity](#)
- 3.6 [Gender](#)
- 3.7 [Veteran Status](#)
- 3.8 [Disabling Condition](#)
- 3.10 [Project Start Date](#)
- 3.11 [Project Exit Date](#)
- 3.12 [Destination](#)
- 3.15 [Relationship to Head of Household](#)
- 3.16 [Client Location](#)
- 3.20 [Housing Move-in Date](#)
- 3.917 [Living Situation](#)

In the 2017 HMIS Data Standards, Data Element 4.17 Residential Move-In Date was significantly modified and became universal data element 3.20 Housing Move-In Date.

3.1 Name

Header	Instruction
Element Name	Name
Field 1 & Response	First (text)
Field 2 & Response	Middle (text)
Field 3 & Response	Last (text)
Field 4 & Response	Suffix (text)
Field 5 & Responses	Name Data Quality
1	Full name reported
2	Partial, street name, or code name reported
8	Client doesn't know
9	Client refused
99	Data not collected
Element Type	Universal
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients

Header	Instruction
Collection Point	Record Creation
System Logic	There is a one-to-one relationship between this data element and 5.8 Personal ID. System stores collected information. Users associated with projects that serve any given client must be able to edit data to correct errors or reflect changes in client responses.
Other System Issues	Systems may elect to utilize an extra field(s) for alias or for notes on name changes.
XML	<Client><...>
CSV	Client
2017 V1 Changes Made	<i>Clarifications to System Logic regarding relationships between data elements; no change is intended, but updates will be required in systems not consistent with this logic.</i>

3.2 Social Security Number

Header	Instruction
Element Name	Social Security Number
Field 1 & Response	Social Security Number
Field 2 & Responses	SSN Data Quality
	1 Full SSN reported
	2 Approximate or partial SSN reported
	8 Client doesn't know
	9 Client refused
	99 Data not collected
Element Type	Universal
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Record Creation
System Logic	There is a one-to-one relationship between this data element and 5.8 Personal ID. System stores collected nine-digit SSN in one field and the appropriate SSN data quality in another. Users associated with projects that serve any given client must be able to edit data to correct errors or reflect changes in client responses.
Other System Issues	The HMIS may include hyphens or other punctuation within the SSN to improve readability, but the SSN must be exportable as a single alphanumeric field containing a maximum of nine characters and no punctuation. HMIS solutions and HMIS administrators (if the system permits) may designate special <i>non-numeric</i> characters (e.g., the letter x) to indicate missing digits and otherwise devise methodologies to allow entry and effective matching of partial SSNs. Because missing digits may appear in any one of the nine placeholders, it is critical for the system to have a mechanism to indicate which digits were missing when entering partial SSNs; an alphabetic character must be interpreted as a placeholder.

Header	Instruction
	The HMIS may elect to add an additional field, in a manner defined by the system, for clients who do not have a SSN to facilitate merging duplicated records.
XML	<Client><...>
CSV	Client
2017 V1 Changes Made	<i>Clarifications to System Logic regarding relationships between data elements; no change is intended, but updates will be required in systems not consistent with this logic.</i>

3.3 Date of Birth

Header	Instruction
Element Name	Date of Birth
Field 1 & Response	Date of Birth
Field 2 & Responses	DOB Data Quality
	1 Full DOB reported
	2 Approximate or partial DOB reported
	8 Client doesn't know
	9 Client refused
	99 Data not collected
Element Type	Universal
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Record Creation
System Logic	There is a one-to-one relationship between this data element and 5.8 Personal ID. System stores collected DOB in one field and the appropriate DOB data quality type in another. Users associated with projects that serve any given client must be able to edit data to correct errors or reflect changes in client responses.
Other System Issues	One date-format field for birth dates should be created in the HMIS database. Date of birth must be exportable in the [date field] format.
XML	<Client><...>
CSV	Client
2017 V1 Changes Made	<i>Clarifications to System Logic regarding relationships between data elements; no change is intended, but updates will be required in systems not consistent with this logic.</i>

3.4 Race

Header	Instruction
Element Name	Race

Data Collected About	All Clients
Collection Point	Record Creation
System Logic	There is a one-to-one relationship between this data element and 5.8 Personal ID. System stores collected information. Users associated with projects that serve any given client must be able to edit data to correct errors or reflect changes in client responses.
Other System Issues	None
XML	<Client><Ethnicity>
CSV	Client
2017 V1 Changes Made	<i>Clarifications to System Logic regarding relationships between data elements; no change is intended, but updates will be required in systems not consistent with this logic.</i>

3.6 Gender

Header	Instruction
Element Name	Gender
Field 1 & Responses	Gender
0	Female
1	Male
2	Trans Female (MTF or Male to Female)
3	Trans Male (FTM or Female to Male)
4	Gender Non-Conforming (i.e. not exclusively male or female)
8	Client doesn't know
9	Client refused
99	Data not collected
Element Type	Universal
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Record Creation
System Logic	There is a one-to-one relationship between this data element and 5.8 Personal ID. System stores collected information. Users associated with projects that serve any given client must be able to edit data to correct errors or reflect changes in client responses.
Other System Issues	All prior response option 4 “other” may change to the new response 4 “Doesn’t identify as male, female, or transgendered”. The same field number may be used in the system and wording may simply be updated to “doesn’t identify as male, female, or transgender” in order to protect the unduplication and reporting capacities of the system already constructed.
XML	<Client><...>
CSV	Client
2017 V1 Changes Made	Wording change on response 2.3.4. No data mapping required.

Header	Instruction
	<i>Clarifications to System Logic regarding relationships between data elements; no change is intended, but updates will be required in systems not consistent with this logic.</i>

3.7 Veteran Status

Header	Instruction
Element Name	Veteran Status
Field 1 & Responses	Veteran Status
0	No
1	Yes
8	Client doesn't know
9	Client refused
99	Data not collected
Element Type	Universal
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Adults
Collection Point	Record Creation
System Logic	There is a one-to-one relationship between this data element and 5.8 Personal ID. System stores collected information and retains for historical purpose. Users associated with projects that serve any given client must be able to edit data to correct errors, reflect changes in client response or status, or to enter a response for a client who has turned 18.
Other System Issues	Users are not required to ask clients under 18 about veteran status; this does not mean that systems are required to hide or exclude this data element from data entry forms. Users may enter 'No' for any client under 18. Systems may be programmed to automatically create a response for clients who turn 18 while enrolled; the auto-generated response should be 'No'.
XML	<Client><VeteranStatus>
CSV	Client
2017 V1 Changes Made	<i>Clarifications to System Logic regarding relationships between data elements; no change is intended, but updates will be required in systems not consistent with this logic.</i>

3.8 Disabling Condition

Header	Instruction
Element Name	Disabling Condition
Field 1 & Responses	Disabling Condition
0	No
1	Yes

Data Collected About	All Clients
Collection Point	Project start (Edit as necessary to reflect new information)
System Logic	<p>There is a one-to-one relationship between this data element and 5.6 Enrollment ID. System stores collected information and retains for historical purpose.</p> <p>A user must be able to set the value of this data element to ‘Yes’ independent of any other data element.</p>
Other System Issues	<p>If all Special Needs elements are present for completion in the HMIS application for a particular project, then disabling condition may be inferred to be “yes” from an answer of “yes” to the dependent field in those elements “expected to be of long-continued and indefinite duration and substantially impairs ability to live independently”. Disabling condition may either be entered by the user independently of any other special need field, or data in this field may be inferred by the responses to “ability to live independently”.</p> <p>If the system auto-populates Disabling Condition, a user must be able to override a system-generated “no” with “yes”. Further, if Disabling Condition is auto-populated with “yes” based solely on a qualifying record for data elements 4.5-4.10 (i.e., the user-entered response was something other than “yes”) and that record is later deleted or edited such that it doesn’t meet the criteria for Disabling Condition, the auto-populated “yes” response must revert to the user’s original response.</p> <p>Regardless of the response to this data element, if a client has a Physical Disability, Developmental Disability, Chronic Health Condition, HIV/AIDS, Mental Health Problem, and/or Substance Abuse issue (data elements 4.5-4.10) that meets the criteria for a disabling condition (Dependent Field A = ‘Yes’), reporting should always count the client as having a Disabling Condition.</p>
XML	<Enrollment><DisablingCondition>
CSV	Enrollment
2017 V1 Changes Made	<i>Clarifications to System Logic regarding relationships between data elements; no change is intended, but updates will be required in systems not consistent with this logic.</i>

3.10 Project Start Date

Header	Instruction
Element Name	Project Start Date
Field 1 & Response	Project Start Date ([date field])
Element Type	Universal
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients

Header	Instruction
Collection Point	Project Start
System Logic	Collect once at each project start; there is a one-to-one relationship between this data element and 5.6 Enrollment ID. System stores collected information and retains for historical purpose.
Other System Issues	<p>The project start date is:</p> <ul style="list-style-type: none"> • for Street Outreach projects – it is the date of first contact with the client. • for Emergency Shelters – it is the night the client first stayed in the shelter for the consecutive shelter period from entry to exit. Night by night shelters, which use a bed-night tracking method will have a project start date and will allow clients to re-enter as necessary without “exiting and restarting” for each stay for a specified period. • for Safe Havens and Transitional Housing – it is the date the client moves into the residential project (i.e. first night in residence). • for all types of Permanent Housing, including Rapid Re-Housing – it is the date following application that the client was admitted into the project. To be admitted indicates the following factors have been met: 1) Information provided by the client or from the referral indicates they meet the criteria for admission (for example if chronic homelessness is required the client indicates they have a serious disability and have been homeless long enough to qualify – though all documentation may not yet have been gathered ; 2) The client has indicated they want to be housed in this project; 3) The client is able to access services and housing through the project. The expectation is the project has a housing opening (on-site, site-based, scattered-site subsidy) or expects to have one in a reasonably short amount of time • for all other types of Service projects including but not limited to: services only, day shelter, homelessness prevention, coordinated assessment, health care it is the date the client first began working with the project and generally received the first provision of service. <p>With these 2017 Data Standards, the date from 3.10 Project Start Date for all PH project entries, except RRH, prior to October 1, 2017 are to be replicated to show in both the new 3.10 Project Start Date element and the 3.20 Housing Move-In Date. The movement of this data corresponds to the previous definition of Project Start Date as the date the household moved into housing and is intended to maintain the data for active reporting as well as longitudinal research.</p> <p>The project start date must be exportable in the [date field] format.</p>
XML	<Enrollment><EntryDate>
CSV	Enrollment
2017 V1 Changes Made	<p>Renamed from Project Entry Date</p> <p>Significant changes to the definition of the element's use for permanent housing projects.</p>

Header	Instruction
	<i>Clarifications to System Logic regarding relationships between data elements; no change is intended, but updates will be required in systems not consistent with this logic.</i>

3.11 Project Exit Date

Header	Instruction
Element Name	Project Exit Date
Field 1 & Response	Project Exit Date ([date field])
Element Type	Universal
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Project Exit
System Logic	Collect once at each project exit; there is a one-to-one relationship between this data element and 5.6 Enrollment ID. System stores collected information and retains for historical purpose.
Other System Issues	<p>The project exit date indicates a client has left the project. For residential projects this is the date of move out.</p> <p>For some “services-only” projects a record may need to remain open an indefinite period and an exit date recorded only when the client completes the service, is no longer in need of the service, has asked to be exited, or has gone missing.</p> <p>A client with an open record (i.e. project start without a project exit) for a CoC defined “extensive length of time” in a shelter, outreach, or prevention program type may be either automatically exited from the project (exit date = date of auto exit) or may be flagged for user intervention and exit. The CoC must be involved in the determination of “extensive length of time” and to which projects the solution is to be applied. This may be accomplished via program setup functionality that may include a data field in each project’s setup/profile to record the period of no client contact after which a client would be flagged for a default exit, or in any other manner the HMIS elects.</p> <p>For systems that require all shelter clients to reapply for service on a nightly basis, the project can enter the entry and exit date at the same time or can specify an HMIS solution that automatically enters the exit date as the day after the entry date for clients of the overnight project.</p> <p>If a client is in a project for a single day and has received some service but has not slept in a bed overnight (i.e., starts and stops before midnight of same day) the Project Exit Date may be the same as the Project Start Date.</p> <p>The project exit date must be exportable in the [date field] format.</p>
XML	<Exit><ExitDate>
CSV	Exit

Element Type	Universal
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Project Exit
System Logic	Collect once at each project exit; there is a one-to-one relationship between this data element and 5.6 Enrollment ID. System stores collected information and retains for historical purpose.
Other System Issues	Users may find it helpful for systems to display exit destinations using the same screen order as 3.917 to facilitate data quality. This is optional but suggested for consideration.
XML	<Exit><....>
CSV	Exit
2017 V1 Changes Made	Wording change to response option 3; Addition of a response option 31. <i>Clarifications to System Logic regarding relationships between data elements; no change is intended, but updates will be required in systems not consistent with this logic.</i>

3.15 Relationship to Head of Household

Header	Instruction
Element Name	Relationship to Head of Household
Field 1 & Responses	Relationship to Head of Household
1	Self
2	Head of household’s child
3	Head of household’s spouse or partner
4	Head of household’s other relation member (other relation to head of household)
5	Other: non-relation member
Element Type	Universal
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Project Start
System Logic	Collect once at each project start; there is a one-to-one relationship between this data element and 5.6 Enrollment ID. System stores collected information and retains for historical purpose. There must be one and only one individual for whom Relationship to Head of Household is ‘Self (head of household)’ for each project start. If the household is composed of adults and children, an adult must be indicated as the head of household.

Header	Instruction
	<p>If the individual designated as head of household exits the project while other members remain, users must be able to edit the Relationship to Head of Household for all household members such that an individual present for the entire project stay is designated as head of household and relationships to the head are correct for other members (including the individual exiting the program).</p> <p>All members of the household accepted into a specific housing project or applicable to a service project are recorded within an HMIS and must either be the Head of Household or have an identified relationship to the Head of Household.</p>
Other System Issues	<p>The term Head of Household is not intended to mean the leader of the house, rather it is to identify one client by which to attach the other household members.</p> <p>Other than ensuring that an adult is indicated as the head of household in a household composed of adults and children, there are no requirements for the identification of the Head of Household established within these standards. Continuums may elect a method of identification and/or Funders may have a preference.</p> <p>It is expected that both the Head of Household and the household member are always in the database together in the same household at a particular project</p> <p>The system must allow for the Head of Household to leave the household and have the household maintain the same Household ID while assigning a new Head of Household.</p> <p>The system must allow for persons to enter or exit the household without having to complete a full program exit and new project start of the entire household.</p>
XML	<Enrollment><RelationshipToHoH>
CSV	Enrollment
2017 V1 Changes Made	<p>Clarification that an adult must be made the head of household if an adult is present. An HMIS may – but is not required to – enforce the requirement.</p> <p><i>Clarifications to System Logic regarding relationships between data elements; no change is intended, but updates will be required in systems not consistent with this logic.</i></p>

3.16 Client Location

Header	Instruction
Element Name	Client Location
Information Date	(date)
Field 1 & Response	HUD assigned CoC code for the client's location
Element Type	Universal
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types

Header	Instruction
Data Collected About	Head of Household
Collection Point	Project Start, Update
System Logic	<p>It must be possible to associate all project stays with one or more (for clients who move while enrolled) Continuum of Care Codes. This data element must be user-entered for all projects with more than one Continuum of Care Code identified in Project Descriptor Data Element 2.3. It may be auto-populated for projects that operate in a single CoC.</p> <p>Collect once at each project start. System stores collected information as “project start” information and retains for historical purpose. Data is time sensitive and may change over the project stay; there is a many-to-one relationship between this data element and 5.9 Household ID.</p> <p>System must allow for updated information collection if change occurs because a client has moved and must record the date the information was collected with a data collection stage of “project update,” and retains all updates for historical purpose.</p>
Other System Issues	<p>To allow projects operating in multiple continuums to enter data into a single ‘host’ HMIS and provide data to each of the continuums in which they are serving clients, a continuum must be identified for each project start. The Continuum of Care Code will be used in continuum reporting in the host HMIS to exclude irrelevant data; it will also be used as a parameter for data export to provide relevant data to other continuums.</p> <p>Data are to indicate the location of the client’s current residence and must be updated if the client moves into a different CoC.</p> <p>Household data must move based on the Head of Household’s identified location.</p> <p>Systems may set up defaults to the continuum code of the HMIS implementation, but must be able to accept any other continuum code identified in data element 2.3 for the project.</p> <p>For data quality, it is recommended that the CoC codes used for this element should be limited to the same CoC codes used for element 2.3 Continuum of Care Code.</p>
XML	<EnrollmentCoC>
CSV	EnrollmentCoC
2017 V1 Changes Made	<i>Clarifications to System Logic regarding relationships between data elements; no change is intended, but updates will be required in systems not consistent with this logic.</i>

3.20 Housing Move-In Date

Header	Instruction
Element Name	Housing Move-In Date
Field 1 & Response	Housing Move-in Date (date)
Element Type	Universal

Header	Instruction
Funder: Program-Component	All Programs – All Permanent Housing Components
Project Type Applicability	3: PH-Permanent Supportive Housing 9: PH-Housing Only 10: PH-Housing with Services (no disability required for entry) 13: PH-Rapid Re-Housing
Data Collected About	Heads of Household
Collection Point	Occurrence Point (At move-in – must be entered if/when a household moves into any type of permanent housing, regardless of funding source or whether the project is providing the rental assistance)
System Logic	Housing Move-In Date must be between the Project Start Date and Project Exit Date. It may be the same date as Project Start if the client moves into housing on the date they were accepted into the program. There is a one-to-one relationship between this data element and 5.9 Household ID. Users must be able to edit data to correct errors.
Other System Issues	For purposes of the Housing Inventory Count and other point-in-time reporting, households with a Project Start date who do not have a Housing Move-In Date at the point in time must be excluded from counts of persons in permanent housing. With the addition of this data element to a wider variety of project types in the 2017 Data Standards, systems must retroactively add the data element for non-RRH projects and populate it with the existing 3.10 Project Start Date. This corresponds to the previous definition of Project Entry Date for non-RRH projects as the date the household moved into housing and enables longitudinal reporting, although the length of time to housing placement will not be valid for clients entering prior to October 1, 2017.
XML	<ResidentialMoveInDate>
CSV	Enrollment
2017 V1 Changes Made	Renamed from 4.17 Residential Move In Date Moved element from Project Specific to Universal Data Element Use of the element expanded to include all types of permanent housing. Retain all data that was formerly in element 4.17 Residential Move in Date (from RRH) in this new element and replicate data as instructed above.

3.917 Living Situation

The former universal data elements 3.9 *Residence Prior to Project Start* and 3.17 *Length of Time on the Streets, in an Emergency Shelter or in a Safe Haven* were combined into one element 3.917 Living Situation in 2014 v5. The element was split into two sub-elements which use only the fields and responses necessary for the population being asked the question. **3.917A** is to be used for all persons entering a Street Outreach, Emergency Shelter or Safe Haven project and **3.917B** is to be used for persons entering all other HMIS project types. The internal HMIS field numbers for the fields and dependents of the sub-elements MUST be the same for like responses. With this separation and clarification, the definition of chronic homelessness as identified in the final rule in the [Federal Register](#) published December 5, 2015 is able to be fully reported through an HMIS.

3. 917A Living Situation

For persons entering HMIS Project Type: Street Outreach, Emergency Shelter, & Safe Haven

Data Collected About	Head of Household and Adults
Collection Point	Project Start
System Logic	This element, 3.917B, is required for all projects which are typed in the HMIS as any project type other than Emergency Shelter (either night by night or entry/exit method), Street Outreach, and Safe Haven. No substitution in language or form may be made in this element. Collect once at each project start; there is a one-to-one relationship between this data element and 5.6 Enrollment ID. System stores collected information and retains for historical purpose. Element 3.917B may not be used by Emergency Shelter Street Outreach or Safe Haven projects in the HMIS. Users must be able to edit data to correct errors or to enter a response for a client who has turned 18. Responses to this data element must always reflect living situation and circumstances as of the Project Start Date and not at the time of collection.
Other System Issues	The data contained in this element must be mapped over in all HMIS implementations from the former 3.9 and 3.17 elements. The HMIS must be able to create dependencies for this element. Data for the fields of this data element should be logically consistent. It is strongly recommended that the HMIS is programmed to enforce these rules or to notify users when inconsistent data has been entered. <ul style="list-style-type: none"> • If there is a “yes” response then the next response elements must be available for data entry. • If there is any other response then the next response element must either be hidden or darkened or in some other way identified as not to be completed.

Header	Instruction
	The internal field numbers for each of the fields and dependents contained within this element MUST be the same as the field numbers used for 3.917A
XML	<Enrollment><...>
CSV	Enrollment
2017 V1 Changes Made	Wording changes for Field 1 Response option 3 and 20 <i>Clarifications to System Logic regarding relationships between data elements; no change is intended, but updates will be required in systems not consistent with this logic.</i>

PROGRAM SPECIFIC DATA ELEMENTS

To meet the statutory and regulatory requirements of federally funded programs using HMIS, additional elements are required for different funding sources. The Program Specific Data Elements are elements that are designed and managed by at least one of the HMIS federal partner programs.

Some of the program specific data elements are collected across most federal partner programs: these are called “Common” Program Specific Data Elements. The rest of the elements are limited to either a single federal partner program or a single component of one of the federal partner programs.

An HMIS must have the ability to enable and restrict visibility of elements based on the funding needs of the program. An HMIS may do this in whatever manner they choose (hard coding, customization via system administrators, etc.). HMIS vendors should note that no federal partner expects that any project would have all elements visible to the user. The strong preference among the federal partners is that only the elements required for the programs that fund a specific project are visible to the users at that project.

Program specific guidance issued through HUD and the individual federal partner in the HMIS Program Manuals provides program setup and visibility information and definitions relevant for the partner.

COMMON DATA ELEMENTS

The HMIS Federal Partners have cooperatively developed these elements. For each Program-Specific Data Element, multiple response categories are provided. Projects may choose to capture more detailed information (or finer response categories) if this information can be exactly mapped to the required response categories described in this section. For reporting purposes, an HMIS must be able to produce required reports using the response categories exactly as they are presented in this section.

- 4.2 [Income and Sources](#)
- 4.3 [Non-Cash Benefits](#)
- 4.4 [Health Insurance](#)
- 4.5 [Physical Disability](#)
- 4.6 [Developmental Disability](#)
- 4.7 [Chronic Health Condition](#)
- 4.8 [HIV/AIDS](#)
- 4.9 [Mental Health Problem](#)
- 4.10 [Substance Abuse](#)
- 4.11 [Domestic Violence](#)
- 4.12 [Contact](#)
- 4.13 [Date of Engagement](#)
- 4.14 [Bed-Night Date](#)
- 4.18 [Housing Assessment Disposition](#)

In the 2017 HMIS Data Standards, Data Element 4.1 Housing Status was retired from use and 4.17 Residential Move-In Date was significantly modified and became universal data element 3.20 Housing Move-In Date.

4.2 Income and Sources

Project Type Applicability	All HMIS Project Types

Header	Instruction
Data Collected About	Heads of Households and Adults
Collection Point	Project Start, Update, Annual Assessment, and Project Exit
System Logic	<p>There is a many-to-one relationship between this data element and 5.6 Enrollment ID. The system must record the data collection stage for each record of this data element. Users are required to collect at project start, annual assessment, and project exit. Systems must allow users to create ‘update’ records to document changes between required collection points. Allow corrections for data entry errors at all stages.</p>
Other System Issues	<p>Data for the fields of this data element should be logically consistent. It is recommended that the HMIS is programmed to enforce these rules or to notify users when inconsistent data has been entered.</p> <ul style="list-style-type: none"> • If there is a “yes” response to “Income from any source” then at least one source of income must be identified. • If a source is identified, then a “Monthly amount” must be entered. • If a “Monthly amount” is entered for any source, then a “Total monthly income” amount is required. • If there is a “no” to Response 2 “Income from any source” then the HMIS must automatically record all sources as “no” and leave dollar amounts null or \$0.00. <p>Note: When a client has income, but does not know the exact amount, a ‘Yes’ response should be recorded for both the overall income question and the specific source, and the income amount should be estimated.</p> <p>To reduce data collection and reporting burden</p> <ul style="list-style-type: none"> • Systems are encouraged to auto-calculate total monthly income to avoid mathematical errors and reduce data collection (generate a \$0.00 for total monthly income if “Income from any source” = “no”) • If a client reports receiving income, an HMIS may be designed such that projects only need to directly enter “yes” for the income source the client receives and have the HMIS automatically generate a “no” response for the other income sources. <p>The HMIS may facilitate data accuracy by automatically changing a “no” in “income from any source” to a “yes” if source(s) and dollar amount(s) are indicated.</p> <p>Updates are required for persons aging into adulthood.</p> <p>The income amounts recorded in an HMIS in Income and Sources do not necessarily equate to documentation of income for “rent calculation” purposes. A rental calculation may not be estimated and has additional sources. Vendors may elect to develop rent calculation tools but should not rely on the income and sources fields for calculations.</p>

99	Data not collected
Element Type	Program Specific
Funder: Program-Component	HUD:CoC – Collection required for all components HUD:ESG – Collection required for all components HUD:HOPWA – Collection required for all components HUD:HUD-VASH - Collection required for all components HUD:PFS – Collection required for all permanent housing projects HUD:RHSAP - Collection required for all components HHS:PATH – Collection required for all components HHS: RHY – Collection required for all components VA:SSVF – No component requires data collection VA:GPD– Collection required for all components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Project Start, Update, and Project Exit
System Logic	Collect at project start and project exit. The system must record the appropriate collection stage for each element. Systems must also allow for update information if a change occurs mid-year. Allow corrections for data entry errors at all stages.
Other System Issues	HMIS may choose to only display dependent questions if user selects the appropriate response.
XML	<Disabilities>
CSV	Disabilities
2017 V1 Changes Made	Removed dependent elements: Documentation of disability and severity on file, and Currently receiving services/treatment for this disability. Additionally, removed PATH ONLY dependent D – if both /how confirmed responses that PATH no longer requires.

4.11 Domestic Violence

Header	Instruction
Element Name	Domestic Violence
Field 1 & Response	Information Date (date information was collected) [date field]
Field 2 & Responses	Domestic Violence Victim/Survivor
0	No
1	Yes
8	Client doesn't know
9	Client refused
99	Data not collected
Dependent A – Dependent to Field 2 & Response 1	<i>If Yes for "Domestic Violence Victim/Survivor"</i> When experience occurred
1	Within the past three months
2	Three to six months ago (excluding six months exactly)
3	Six months to one year ago (excluding one year exactly)
4	One year ago or more
8	Client doesn't know
9	Client refused
99	Data not collected
Dependent B – Dependent to Field 2 & Response 1	<i>If Yes for "Domestic Violence Victim/Survivor"</i> Are you currently fleeing?
0	No
1	Yes
8	Client doesn't know
9	Client refused
99	Data not collected
Element Type	Program Specific
Funder: Program-Component	HUD:CoC – Collection required for all components HUD:ESG – Collection required for all components HUD:HOPWA – Collection required for all components HUD:HUD-VASH - Collection required for all components HUD:PFS – Collection required for all permanent housing projects HUD:RHSAP - Collection required for all components VA:SSVF – No component requires data collection VA:GPD– Collection required for all components
Project Type Applicability	All HMIS Project Types
Data Collected About	Head of Household and Adults
Collection Point	Project Start, Update
System Logic	The system must record the appropriate collection stage for each element. Allow corrections for data entry errors at all stages. Data are time sensitive and may change over the project stay. System must allow for updated information collection if change occurs, must record the date

Header	Instruction
	the information was collected with a data collection stage of “project update,” and must retain all updates for historical purpose.
Other System Issues	None
XML	<DomesticViolence>
CSV	HealthAndDV
2017 V1 Changes Made	None

4.12 Contact

Header	Instruction
Element Name	Contact
Field 1 & Response	Information Date (date of contact) [date field]
Field 2 & Responses	Staying on Streets, ES, or SH
0	No
1	Yes
2	Worker unable to determine
Element Type	Program Specific
Funder: Program-Component	HUD:CoC – Collection only required for Street Outreach HUD:ESG – Collection only required for Street Outreach and ES - nbn HHS:PATH – Collection required for all components HHS: RHY – Collection only required for Street Outreach
Project Type Applicability	1:Emergency Shelter – night by night method only 4:Street Outreach 6:Services Only
Data Collected About	Head of Household and Adults
Collection Point	Occurrence Point (At the Time of Contact)
System Logic	The data in this element are transactional data; each time there is a contact a record of the contact must be recorded and including the date and the homeless status. There is a many-to-one relationship between this data element and 5.6 Enrollment ID.
Other System Issues	The first contact would be the contact made at project start. A contact would be expected to be made on the date of engagement. There may or may not be a contact made at project exit. One record of contact is required as an update for each contact made along with the response to Field 2 which may change over the project stay.
XML	<ServiceFAReferral>
CSV	Services
2017 V1 Changes Made	Field 2 and responses changed from “Location of Contact” to “Staying on Streets, ES or SH”

4.13 Date of Engagement

Header	Instruction
Element Name	Date of Engagement

Header	Instruction
Field 1 & Response	Date of Engagement (date) [date field]
Element Type	Program Specific
Funder: Program-Component	HUD:CoC – Collection only required for Street Outreach
	HUD:ESG – Collection only required for Street Outreach and ES - nbn
	HHS:PATH – Collection required for all components
	HHS: RHY – Collection only required for Street Outreach
Project Type Applicability	1:Emergency Shelter – night by night method only 4:Street Outreach 6:Services Only
Data Collected About	Head of Household and Adults
Collection Point	Occurrence Point (At the Point of Engagement)
System Logic	Only one date of engagement is allowed between the project start date and project exit date. There is a one-to-one relationship between this data element and 5.6 Enrollment ID.
Other System Issues	If a client returns to the project at a later date the previous date of engagement does not apply to the new project stay. The data must be reentered based on the situation during the new project stay. It is possible that a case may be closed without the client becoming engaged and thus null in that client record.
XML	<Enrollment>
CSV	Enrollment
2017 V1 Changes Made	<i>Clarifications to System Logic regarding relationships between data elements; no change is intended, but updates will be required in systems not consistent with this logic.</i>

4.14 Bed-night Date

Header	Instruction
Element Name	Bed-night Date
Field 1 & Response	Bed-night Date (date) [date field]
Element Type	Program Specific
Funder: Program-Component	HUD: ESG – Collection required for ES - nbn
Project Type Applicability	1: Emergency Shelter - nbn method (Applicability extends to all nbn method shelters that are not funded through ESG but also participate in HMIS.)
Data Collected About	All Clients
Collection Point	Occurrence Point (As Provided)
System Logic	Collect once for each bed night utilized.
Other System Issues	A bed night date indicates that the client has utilized a bed in a night-by-night shelter on that date. The system must be able to store a theoretically unlimited number of bed night dates for any Enrollment ID associated with a night-by-night shelter. There must be a record of a bed night on the project start date into the shelter; any additional bed night dates must be after the project start date and before the project exit date.

Header	Instruction
	The bed-night date must be exportable in the [date field] format.
XML	<ServiceFAReferral>
CSV	Services
2017 V1 Changes Made	Renumbered – formerly 4.14E No other changes made.

4.18 Housing Assessment Disposition

Header	Instruction
Element Name	Housing Assessment Disposition
Field 1 & Responses	Assessment Disposition
1	Referred to emergency shelter/safe haven
2	Referred to transitional housing
3	Referred to rapid re-housing
4	Referred to permanent supportive housing
5	Referred to homelessness prevention
6	Referred to street outreach
7	Referred to other continuum project type
8	Referred to a homelessness diversion program
9	Unable to refer/accept within continuum; ineligible for continuum projects
10	Unable to refer/accept within continuum; continuum services unavailable
11	Referred to other community project (non-continuum)
12	Applicant declined referral/acceptance
13	Applicant terminated assessment prior to completion
14	Other/specify
Dependent A – Dependent to Field 1 & Response 14	<i>If Other/ specify for “Assessment Disposition”</i> Text box
Element Type	Program Specific

2017 V1 Changes Made	None

INDIVIDUAL FEDERAL PARTNER PROGRAM ELEMENTS

These elements are listed under the federal partner program which maintains the element. There are elements maintained by one partner and shared with one other. When combined with UDE's and Common Elements these elements form the basis of data collection requirements for specific project level reporting generated by an HMIS.

CoC Program Element Visibility – Collection Requirements

The elements shown are only those in which at least one CoC program component is required to collect information.

Program Specific Components and Project Types

Component	Project Type #	Project Type Name
Homelessness Prevention (High Performing Communities Only)	12	Homelessness Prevention
Permanent Housing – PSH	3	PH – PSH (disability required)
Permanent Housing -RRH	13	PH - Rapid Re-Housing
Supportive Services Only		Refer to CoC Program HMIS Manual
Transitional Housing	2	Transitional Housing
Legacy – Safe Haven***	8	Safe Haven
Legacy – SRO****	9	PH-Housing Only

Program Specific Visibility – Collection Requirements

Number	Element	Homelessness Prevention	Permanent Supportive Housing	Rapid Re-Housing	Supportive Services Only	Transitional Housing
4.2	Income and Sources	x	x	x	x	x
4.3	Non-Cash Benefits	x	x	x	x	x
4.4	Health Insurance	x	x	x	x	x
4.5	Physical Disability	x	x	x	x	x
4.6	Developmental Disability	x	x	x	x	x

- W2 [Financial Assistance— HOPWA](#)
- W3 [Medical Assistance](#)
- W4 [T-cell \(CD4\) and Viral Load](#)
- W5 [Housing Assessment at Exit](#)

W1 Services Provided – HOPWA

Header	Instruction
Element Name	Services Provided - HOPWA
Field 1 & Response	Date of Service (date) [date field]
Field 2 & Responses	Type of Service
1	Adult day care and personal assistance
2	Case management
3	Child care
4	Criminal justice/legal services
5	Education
6	Employment and training services
7	Food/meals/nutritional services
8	Health/medical care
9	Life skills training
10	Mental health care/counseling
11	Outreach and/or engagement
12	Substance abuse services/treatment
13	Transportation
14	Other HOPWA funded service
Element Type	Program Specific
Funder: Program-Component	HUD: HOPWA – Collection required for all components
Project Type Applicability	1: Emergency Shelter – e/e method 2: Transitional Housing 3: PH-Permanent Supportive Housing 6: Services Only 12: Homelessness Prevention
Data Collected About	All Clients receiving services
Collection Point	Occurrence Point (As Provided) Note: HOPWA requires that all “stayers” at the end of their annual operating year and prior to the generation of their Annual Report (CAPER or APR) enter all services provided through the end of the operating year.
System Logic	Data are time sensitive and may change over the project stay. System must allow for multiple records per project stay to record each instance and must record the date the service was provided.

Header	Instruction
Other System Issues	The data in this element are transactional data; each time the service is delivered a record of the date of service and the service element must be maintained. If service benefits entire household, it may be recorded solely for the Head of Household.
XML	<ServiceFAReferral>
CSV	Services
2017 V1 Changes Made	Renumbered – formerly 4.14C No other changes made.

W2 Financial Assistance- HOPWA

Header	Instruction
Element Name	Financial Assistance - HOPWA
Field 1 & Response	Date of Financial Assistance (date) [date field]
Field 2 & Responses	Financial Assistance Type
1	Rental assistance [<i>collect for PHP and STRMU and PH-TBRA</i>]
2	Security deposits [<i>collect for PHP</i>]
3	Utility deposits [<i>collect for PHP</i>]
4	Utility payments [<i>collect for PHP and STRMU</i>]
7	Mortgage assistance [<i>collect for STRMU</i>]
Field 3 & Response	Financial Assistance Amount (amount)
Element Type	Program Specific
Funder: Program-Component	HUD: HOPWA- Collection required for PHP and STRMU only as indicated above
Project Type Applicability	6: Services Only 12: Homelessness Prevention
Data Collected About	Head of Household
Collection Point	Occurrence Point (As Provided)
System Logic	Data are time sensitive and may change over the project stay. System must allow for multiple records per project stay to record each instance and must record the date the financial assistance was provided.
Other System Issues	The data in this element are transactional data; each time there is financial assistance provided a record of the assistance must be recorded including the date and financial assistance information. Records of financial assistance should be attached to the Head of Household.
XML	<ServiceFAReferral>
CSV	Services
2017 V1 Changes Made	Renumbered – formerly 4.15A No other changes made.

W3 Medical Assistance

Header	Instruction
Element Name	Medical Assistance
Field 1 & Response	Information Date (date information was collected) [date field]

Header	Instruction
Field 2 & Responses	Receiving Public HIV/AIDS Medical Assistance
0	No
1	Yes
8	Client doesn't know
9	Client refused
99	Data not collected
Dependent A –Dependent to Field 2 and Response 0	<i>If No for "Receiving Public HIV/AIDS Medical Assistance"</i> Reason
1	Applied; decision pending
2	Applied; client not eligible
3	Client did not apply
4	Insurance type N/A for this client
8	Client doesn't know
9	Client refused
99	Data not collected
Field 3 & Responses	Receiving AIDS Drug Assistance Program (ADAP)
0	No
1	Yes
8	Client doesn't know
9	Client refused
99	Data not collected
Dependent B – Dependent to Field 3 & Response 0	<i>If No for "Receiving AIDS Drug Assistance Program (ADAP)"</i> Reason
1	Applied; decision pending
2	Applied; client not eligible
3	Client did not apply
4	Insurance type N/A for this client
8	Client doesn't know
9	Client refused
99	Data not collected
Element Type	Program Specific
Funder: Program-Component	HUD: HOPWA – Collection required for all components
Project Type Applicability	1: Emergency Shelter 2: Transitional Housing 3: PH-Permanent Supportive Housing 6: Services Only 12: Homelessness Prevention
Data Collected About	All Household Members with HIV/AIDS
Collection Point	Project Start, Update, Project Exit
System Logic	The system must record the appropriate collection stage for each element. Systems must also allow for update information if a change occurs mid-year. Allow corrections for data entry errors at all stages.

Header	Instruction
Other System Issues	None
XML	<MedicalAssistance>
CSV	IncomeBenefits
2017 V1 Changes Made	Renumbered – formerly 4.39 No other changes made.

W4 T-cell (CD4) and Viral Load

Header	Instruction
Element Name	T-cell (CD4) and Viral Load
Field 1 & Response	Information Date (date information was collected) [date field]
Field 2 & Responses	T-Cell (CD4) Count Available
0	No
1	Yes
8	Client doesn't know
9	Client refused
99	Data not collected
Dependent A – Dependent to Field 2 & Response 1	<i>If a yes to “T-Cell (CD4) Count Available” then</i> T-cell Count (integer between 0 – 1500)
Dependent B - Dependent to Dependent A & Response	<i>If a number is entered in the T-Cell (CD4) count then</i> How was the information obtained
1	Medical Report
2	Client report
3	Other
Field 3 & Responses	Viral Load Information Available
0	Not Available
1	Available
2	Undetectable
8	Client doesn't know
9	Client refused
99	Data not collected
Dependent A – Dependent to Field 3 & Response 1	<i>If “Viral Load Information Available” then</i> Count (integer between 0 – 999999)
Dependent B - Dependent to Dependent A & Response 2	<i>If a number is entered in the Viral Load count then</i> How was the information obtained
1	Medical Report
2	Client report
3	Other
Element Type	Program Specific
Funder: Program-Component	HUD: HOPWA – Collection required for all component
Project Type Applicability	1: Emergency Shelter 2: Transitional Housing 3: PH-Permanent Supportive Housing

Header	Instruction
	6: Services Only 12: Homelessness Prevention
Data Collected About	Only Clients funded in a HOPWA project presenting with HIV/AIDS
Collection Point	Project Start, Update, Annual Assessment, Project Exit
System Logic	Collect at project start and project exit. Data should be updated every 6 months following project start thru to project exit and at a minimum at Annual Assessment. The system must record the appropriate collection stage for each element. Systems must also allow for update information if a change occurs mid-year. Allow corrections for data entry errors at all stages.
Other System Issues	It is recommended that an HMIS only display this question as dependent to HMIS Data Standards Element 4.8 (HIV/AIDS) where the response is “yes” (1). If possible the system should limit the numeric range of the “viral load information available” – response option 1 “available” to 21 to 999,999 as a response of 20 or less is associated with an “undetectable” viral load.
XML	<Disabilities>
CSV	Disabilities
2017 V1 Changes Made	Renumbered – formerly 4.47 No other changes made.

W5 Housing Assessment at Exit

Header	Instruction
Element Name	Housing Assessment at Exit
Field 1 & Responses	Housing Assessment at Exit
	1 Able to maintain the housing they had at project entry
	2 Moved to new housing unit
	3 Moved in with family/friends on a temporary basis
	4 Moved in with family/friends on a permanent basis
	5 Moved to a transitional or temporary housing facility or program
	6 Client became homeless – moving to a shelter or other place unfit for human habitation
	7 Client went to jail/prison
	10 Client died
	8 Client doesn't know
	9 Client refused
	99 Data not collected
Dependent A – Dependent to Field 1 & Response 1	If Able to maintain the housing they had at project entry for “Housing Assessment at Exit” Subsidy information
	1 Without a subsidy
	2 With the subsidy they had at project entry
	3 With an on-going subsidy acquired since project entry
	4 Only with financial assistance other than a subsidy

Header	Instruction
Dependent B – Dependent to Field 1 & Response 2	<i>If Moved to new housing unit for “Housing Assessment at Exit”</i> Subsidy information
	1 With on-going subsidy
	2 Without an on-going subsidy
Element Type	Program Specific
Funder: Program-Component	HUD: CoC – Collection required only for Homelessness Prevention component HUD: ESG – Collection required only for Homelessness Prevention component HUD: HOPWA – Collection required for all components
Project Type Applicability	1: Emergency Shelter 2: Transitional Housing 3: PH-Permanent Supportive Housing 6: Services Only 12: Homelessness Prevention
Data Collected About	All Clients
Collection Point	Project Exit
System Logic	Collect once at each project exit. System stores collected information as “project exit” information and retains for historical purpose.
Other System Issues	None

- P1 [Services Provided – PATH Funded](#)
- P2 [Referrals Provided - PATH](#)
- P3 [PATH Status](#)
- P4 [Connection with SOAR](#)

P1 Services Provided – PATH Funded

Header	Instruction
Element Name	Services Provided –PATH Funded
Field 1 & Response	Date of Service (date) [date field]
Field 2 & Responses	Type of PATH FUNDED Service Provided
1	Re-engagement
2	Screening
14	Clinical assessment
3	Habilitation/rehabilitation
4	Community mental health
5	Substance use treatment
6	Case management
7	Residential supportive services
8	Housing minor renovation
9	Housing moving assistance
10	Housing eligibility determination
11	Security deposits
12	One-time rent for eviction prevention
Element Type	Program Specific
Funder: Program-Component	HHS: PATH – Collection required for all components
Project Type Applicability	PATH: 4: Street Outreach 6: Services Only
Data Collected About	Head of Household and Adults
Collection Point	Occurrence Point (As Provided)
System Logic	Data are time sensitive and may change over the project stay. System must allow for multiple records per project stay to record each instance and must record the date the service was provided.
Other System Issues	<p>The data in this element are transactional data; each time the service is delivered a record of the date of service and homeless status of the client must be added.</p> <p>If a service benefits the entire household, it must be recorded for the Head of Household.</p> <p>PATH only records <u>services that are PATH funded</u>. If providers want to collect other services, then a separate element must be created to distinguish PATH funded services from non-PATH funded services.</p> <p>PATH reports will only include persons who received services who are enrolled.</p>
XML	<ServiceFAReferral>
CSV	Services

Header	Instruction
2017 V1 Changes Made	Renumbered – formerly 4.14A No other changes made.

P2 Referrals Provided – PATH

Header	Instruction
Element Name	Referrals Provided PATH
Field 1 & Response	Date of Referral (date) [date field]
Field 2 & Responses	Type of Referral
1	Community Mental Health
2	Substance Use Treatment
3	Primary Health/ Dental Care
4	Job Training
5	Educational Services
6	Housing Services
11	Temporary Housing
7	Permanent Housing
8	Income Assistance
9	Employment Assistance
10	Medical Insurance
Dependent A – Dependent to Field 2 & Responses 1-10	If any “Type of Referral” made Select Outcome for each
1	Attained
2	Not attained
3	Unknown
Element Type	Program Specific
Funder: Program-Component	HHS: PATH – Collection required for all components
Project Type Applicability	4: Street Outreach 6: Services Only
Data Collected About	Heads of Household and Adults
Collection Point	Occurrence Point (As Provided)
System Logic	Data are time sensitive and may change over the project stay. System must allow multiple records per project stay to record each instance and must record the date the referral was provided.
Other System Issues	The data in this element are transactional data; each time there is a referral a record of the referral must be recorded. Multiple types of the same referral may be made over the course of project enrollment. Each referral should have an outcome response. Referral outcome is being shown as a dependent response. However, the responses of attained, not attained, or unknown may have better ways of presentation for data collection than as dependent fields as the response may not be known simultaneous with identification of the referral. Vendors may elect means other than a dependent field to improve data quality. The information is required on reporting.

Header	Instruction
	PATH only will report on persons who received services who are enrolled.
XML	<ServiceFAReferral>
CSV	Services
2017 V1 Changes Made	Renumbered – formerly 4.16A Collection of data related to referrals to job training, educational services, and housing services were optional response options and are now required.

P3 PATH Status

Header	Instruction
Element Name	PATH Status
Field 1 & Response	Date of Status Determination (date) [date field]
Field 2 & Responses	Client Became Enrolled in PATH
0	No
1	Yes
Dependent A – Dependent to Field 2 & Response 0	<i>If No for "Client Became Enrolled in PATH"</i> Reason not enrolled
1	Client was found ineligible for PATH
2	Client was not enrolled for other reason(s)
Element Type	Program Specific
Funder: Program-Component	HHS: PATH – Collection required for all components
Project Type Applicability	4: Street Outreach 6: Services Only
Data Collected About	Head of Household and Adults
Collection Point	Occurrence Point (At Determination; collect once, at or before exit, when the status is determined)
System Logic	Collect once at or before each project exit. System stores collected information and retains for historical purpose.
Other System Issues	Only one PATH status date and response is allowed for each project stay. If a client exits and returns to the project later, the previously entered enrollment data does not apply and a new response must be entered based on this new project start and project exit service period. If the HMIS supports requiring elements, then this element and its dependent response should be required for PATH at project exit and the client should not be able to be exited without a response to this element. This element is critical to PATH reporting.
XML	<PATHStatus>
CSV	Enrollment
2017 V1 Changes Made	Renumbered – formerly 4.20 No other changes made.

P4 Connection with SOAR

Header	Instruction
Element Name	Connection with SOAR
Field 1 & Responses	Connection with SOAR
0	No
1	Yes
8	Client doesn't know
9	Client refused
99	Data not collected
Element Type	Program Specific
Funder: Program-Component	HHS: PATH – Collection required for all components VA: SSVF –all components
Project Type Applicability	PATH: 4: Street Outreach 6: Services Only SSVF: 12 Homelessness Prevention 13 PH-RRH
Data Collected About	Head of Household and Adults
Collection Point	Project Start, Update, Annual Assessment and Exit
System Logic	The system must record the appropriate collection stage for each element. Systems must also allow for update information if a change occurs mid-year. Allow corrections for data entry errors at all stages.
Other System Issues	If the SOAR program is locally available CoC's may find this element helpful to their CoCs for implementation in programs other than PATH.
XML	<ConnectionWithSOAR>
CSV	Exit
2017 V1 Changes Made	Renumbered – formerly 4.21 Element now shared with VA – SSVF which requires collection on it for both their Homelessness Prevention and Rapid Re-Housing projects

Pay for Success (PFS) Program Element Visibility – Collection Requirements

In the 2017 HMIS Data Standards, Data Element 4.16B Referral Provided - RHY and 4.38 Family Unification Achieved were both retired from use by RHY.

Please note: All unaccompanied youth are their own Head of Household. The term “unaccompanied youth” has been removed from the Data Dictionary as it was redundant and confusing at times. There are occasions where one or more youth present together at project start, in these cases each youth should be in their own household and therefore will be their own head of household with data collected about them as appropriate to the project they are entering.

Note: In 2017 HUD funded 10 Youth Homeless Demonstration Programs (YHDP) across the country. These programs, locally and nationally, may elect to use some of the RHY elements to more fully understand the population and factors necessary for ending youth homelessness. HMIS systems must allow the RHY elements to be utilized by YHDP programs as they are developed. Local HMIS Administrators of the YHDP communities will be involved in planning and training efforts to fully understand the use of these elements in this way.

R1 Referral Source

Header	Instruction
Element Name	Referral Source
Field 1 & Responses	Referral Source
1	Self-Referral
2	Individual: Parent/Guardian/Relative/Friend/Foster Parent/Other Individual
7	Outreach Project
11	Temporary Shelter
18	Residential Project:
28	Hotline:
30	Child Welfare/CPS
34	Juvenile Justice
35	Law Enforcement/ Police
37	Mental Hospital
38	School
39	Other Organization
8	Client doesn't know
9	Client refused
99	Data not collected
Dependent A – Dependent to Field 1 & Response 7	<i>If Outreach Project: FYSB for “Referral Source” is selected Number of times approached by outreach prior to entering the project (Box for integer response)</i>
Element Type	Program Specific
Funder: Program-Component	HHS: RHY – Collection required for all components except for Street Outreach
Project Type Applicability	1: Emergency Shelter 2: Transitional Housing 12: Homelessness Prevention
Data Collected About	Head of Household and Adults
Collection Point	Project Start
System Logic	Collect once at each project start. System stores collected information as “project start” information and retains for historical purpose.
Other System Issues	None
XML	<EntryRHY>
CSV	Enrollment
2017 V1 Changes Made	Renumbered – formerly 4.34 Response options were streamlined and decreased to reduce data collection burden. Previous responses entered are required to be mapped to these new more streamlined responses (Field numbers from 2014 were maintained for mapping and tracking purposes)

R2 RHY – BCP Status

Header	Instruction
Element Name	RHY – BCP Status
Field 1 & Response	Date of Status Determination (date) [date field]
Field 2 & Responses	Youth Eligible for RHY Services
0	No
1	Yes
Dependent A – Dependent to	<i>If No for "Youth Eligible for RHY Services"</i>
Field 2 & Response 0	Reason why services are not funded by BCP grant
1	Out of age range
2	Ward of the State – Immediate Reunification
3	Ward of the Criminal Justice System – Immediate Reunification
4	Other
Dependent B – Dependent to	<i>If Yes for "Youth Eligible for RHY Services"</i>
Field 2 & Response 1	Runaway youth
0	No
1	Yes
8	Client doesn't know
9	Client refused
99	Data Not Collected
Element Type	Program Specific
Funder: Program-Component	HHS: RHY – Collection required for BCP only
Project Type Applicability	1: Emergency Shelter – e/e method 12: Homelessness Prevention
Data Collected About	All Clients
Collection Point	Project Start
System Logic	Collect once. System stores collected information as “update” information and retains for historical purpose.
Other System Issues	<p>Only one RHY status date and only one response for “FYSB Youth” is allowed for each project stay. If a client returns to the project at a later date the previous data does not apply and must be entered based on this project start and project exit date service period.</p> <p>Youth who identify as “no” to FYSB Youth are also not homeless under the HUD definition of homelessness. Therefore, these youths should be excluded from all PIT/HIC reporting on the project. Data on these youth who are identified as “no” to FYSB Youth does transmit in the RHY CSV export for the national data transfers, but is filtered out in analysis.</p> <p>If the system supports required elements, then this element should be required for RHY:BCP-es funded projects and the client should not be able to exit the project without a response to this element.</p>

2017 V1 Changes Made	Renumbered – formerly 4.15B No other changes made.

V4 Percent of AMI (SSVF Eligibility)

Header	Instruction
Element Name	Percent of AMI (SSVF Eligibility)
Field 1 & Responses	Household Income as a Percentage of AMI
1	Less than 30%
2	30% to 50%
3	Greater than 50%
Element Type	Program Specific
Funder: Program-Component	VA:SSVF – Collection required for all components
Project Type Applicability	12: Homelessness Prevention 13: PH-Rapid Re-Housing
Data Collected About	Head of Household
Collection Point	Project Start
System Logic	Collect once at each project start; there is a one-to-one relationship between this data element and 5.9 Household ID. System stores collected information as “project start” information and retains for historical purpose.

Header	Instruction
Other System Issues	The system may not automatically calculate this field unless the VA Annual Income worksheet is part of the HMIS and the field is calculated from that worksheet. Calculation from Income and Sources is prohibited.
XML	<EntrySSVF>
CSV	Enrollment
2017 V1 Changes Made	Renumbered – formerly 4.42 Name changed.

V5 Last Permanent Address

Header	Instruction
Element Name	Last Permanent Address
Field 1 & Response	Street Address
Field 2 & Response	City
Field 3 & Response	State
Field 4 & Response	Zip Code
Field 5 & Responses	Address Data Quality
	1 Full address reported
	2 Incomplete or estimated address reported
	8 Client doesn't know
	9 Client refused
	99 Data not collected
Element Type	Program Specific
Funder: Program-Component	HUD:HUD-VASH - Collection required for all components VA:SSVF – Collection required for all components
Project Type Applicability	3: PH – Permanent Supportive Housing 12: Homelessness Prevention 13: PH-Rapid Re-Housing
Data Collected About	Head of Household
Collection Point	Project Start
System Logic	Collect once at each project start. System stores collected information as “project start” information and retains for historical purpose.
Other System Issues	None
XML	<EntrySSVF>
CSV	Enrollment
2017 V1 Changes Made	Renumbered – formerly 4.43 No other changes made.

V6 VAMC Station Number

Header	Instruction
Element Name	VAMC Station Number
Field 1 & Response	VAMC Station Number [drop down list of all VAMC Station codes and names]
Element Type	Program Specific

Header	Instruction
Funder: Program-Component	HUD:HUD-VASH - Collection required for all components VA:SSVF – Collection required for all components
Project Type Applicability	3: PH – Permanent Supportive Housing 12: Homelessness Prevention 13: PH-Rapid Re-Housing
Data Collected About	Head of Household
Collection Point	Project Start
System Logic	Collect once at each project start.
Other System Issues	Valid VAMC Station Numbers are up to 8 alphanumeric characters and should correspond to the VA service location (as opposed to 3.16 Client Location). SSVF grantees will be provided with station numbers that correspond to their service locations. Station Numbers are provided to vendors through the HMIS Vendor HUB. No information date or data collection stage is required; the effective information date is the Project Start Date and data are only collected at project start; there is a one-to-one relationship between this data element and 5.9 Household ID.
XML	<EntrySSVF>
CSV	Enrollment
2017 V1 Changes Made	Renumbered – formerly 4.45 <i>Clarifications to System Logic regarding relationships between data elements; no change is intended, but updates will be required in systems not consistent with this logic.</i> Field 1 changed from text field to drop-down list of all VAMC Station codes and names.

V7 SSVF HP Targeting Criteria

Header	Instruction
Field 1 & Responses	Referred by Coordinated Entry or a homeless assistance provider to prevent the household from entering an emergency shelter or transitional housing or from staying in a place not meant for human habitation.
0	No (0 points)
1	Yes
Field 2 & Responses	Current housing loss expected within...
0	0-6 days
1	7-13 days
2	14-21 days
3	More than 21 days (0 points)
Field 3 & Responses	Current household income is \$0
0	No (0 points)
1	Yes
Field 4 & Responses	Annual household gross income amount
0	0-14% of Area Median Income (AMI) for household size
1	15-30% of AMI for household size
2	More than 30% of AMI for household size (0 points)

Header	Instruction
Field 5 & Responses	Sudden and significant decrease in cash income (employment and/or cash benefits) AND/OR unavoidable increase in non-discretionary expenses (e.g., rent or medical expenses) in the past 6 months
0	No (0 points)
1	Yes
Field 6 & Responses	Major change in household composition (e.g., death of family member, separation/divorce from adult partner, birth of new child) in the past 12 months
0	No (0 points)
1	Yes
Field 7 & Responses	Rental Evictions within the Past 7 Years
0	4 or more prior rental evictions
1	2-3 prior rental evictions
2	1 prior rental eviction
3	No prior rental evictions (0 points)
Field 8 & Responses	Currently at risk of losing a tenant-based housing subsidy or housing in a subsidized building or unit
0	No (0 points)
1	Yes
Field 9 & Responses	History of Literal Homelessness (street/shelter/transitional housing)
0	4 or more times or total of at least 12 months in past three years
1	2-3 times in past three years
2	1 time in past three years
3	None (0 points)
Field 10 & Responses	Head of household with disabling condition (physical health, mental health, substance use) that directly affects ability to secure/maintain housing
0	No (0 points)
1	Yes
Field 11 & Responses	Criminal record for arson, drug dealing or manufacture, or felony offense against persons or property
0	No (0 points)
1	Yes
Field 12 & Responses	Registered sex offender
0	No (0 points)
1	Yes
Field 13 & Responses	At least one dependent child under age 6
0	No (0 points)
1	Yes
Field 14 & Responses	Single parent with minor child(ren)
0	No (0 points)
1	Yes
Field 15 & Responses	Household size of 5 or more requiring at least 3 bedrooms (due to age/gender mix)
0	No (0 points)
1	Yes
Field 16 & Responses	Any Veteran in household served in Iraq or Afghanistan

Header	Instruction
0	No (0 points)
1	Yes
Field 17 & Responses	Female Veteran
0	No (0 points)
1	Yes
Field 20 & Response	HP applicant total points (integer)
Field 21 & Response	Grantee targeting threshold score (integer)
Element Type	Program-Specific
Project Type Applicability	12: Homelessness Prevention
Funder: Program-Component	VA:SSVF – Collection required for all components
Data Collected About	Head of Household
Collection Point	Project Start
System Logic	Collect and enter results of SSVF Homelessness Prevention Stage 2 Targeting Criteria Screening as of the date of project start; there is a one-to-one relationship between this data element and 5.9 Household ID. Records must be editable in order for users to correct data entry errors.
Other System Issues	There are redundancies between this data element and other data collection, including 3.8 Disabling Condition, 4.2 Income and Sources, V1 Veteran's Information, V4 Percent of AMI (SSVF Eligibility), and data related to household composition. Consistency in responses for this data element and others will be used in evaluation of SSVF data quality.
XML	<EntrySSVF>
CSV	Enrollment
2017 V1 Changes Made	Renumbered – formerly 4.48 <i>Clarifications to System Logic regarding relationships between data elements; no change is intended, but updates will be required in systems not consistent with this logic.</i>

V8 HUD-VASH Voucher Tracking

Header	Instruction
Element Name	HUD-VASH Voucher Tracking
Field 1	Information date [date field]
Field 2 & Responses	Voucher change
1	Referral package forwarded to PHA
2	Voucher denied by PHA
3	Voucher issued by PHA
4	Voucher revoked or expired
5	Voucher in use – veteran moved into housing
6	Voucher was ported locally
7	Voucher was administratively absorbed by new PHA
8	Voucher was converted to Housing Choice Voucher
9	Veteran exited – voucher was returned
10	Veteran exited – family maintained the voucher

Header	Instruction
11	Veteran exited – prior to ever receiving a voucher
12	Other
Dependent A – Dependent to Field 2 & Response 12	<i>If Other–</i> text box for Specify
Element Type	Program Specific
Funder: Program-Component	HUD:HUD-VASH – Collection required for HUD/VASH-OTH
Project Type Applicability	3: PH – Permanent Supportive Housing
Data Collected About	Head of Household/Veteran
Collection Point	Project Start, Update, and Project Exit
	There may be only one response per Information Date.
System Logic	The system must record the appropriate collection stage for each element. Systems must also allow for update information if a change occurs mid-year. Allow corrections for data entry errors at all stages.
Other System Issues	None
XML	<ServiceFAReferral>
CSV	Services
2017 V1 Changes Made	NEW element

V9 HUD-VASH Exit Information

Header	Instruction
Element Name	HUD-VASH Exit Information
Field 1	Case Management Exit Reason
1	Accomplished goals and/or obtained services and no longer needs CM
2	Transferred to another HUD-VASH program site
3	Found/chose other housing
4	Did not comply with HUD-VASH CM
5	Eviction and/or other housing related issues
6	Unhappy with HUD-VASH housing
7	No longer financially eligible for HUD-VASH voucher
8	No longer interested in participating in this program
9	Veteran cannot be located
10	Veteran too ill to participate at this time
11	Veteran is incarcerated
12	Veteran is deceased
13	Other
Dependent B – Dependent to Field 1 & Response 13	<i>If Other–</i> text box for Specify

Data Collected About	Head of Household/Veteran

Header	Instruction
Collection Point	Project Exit
System Logic	The system must record the appropriate collection stage for each element.
Other System Issues	None
XML	<ExitVASH>
CSV	Exit
2017 V1 Changes Made	NEW element

METADATA ELEMENTS

The term *metadata* is often defined as ‘data about data.’ Instead of capturing information about a project or a client, Metadata Elements capture information about the data itself: when it was collected, when it was entered into HMIS, who entered it, and which project is responsible for it.

The Metadata Elements are intended to facilitate reporting from HMIS, to simplify the writing of programming specifications, and to provide an audit trail. These elements do not represent an attempt to standardize the way that an HMIS stores data. As long as the HMIS is able to accomplish the purposes identified for the Metadata Elements, the software is not required to use the exact metadata elements listed here. Future programming specifications for reports will reference these Metadata Elements. The Metadata Elements are:

- 5.1 [Date Created](#)
- 5.2 [Date Updated](#)
- 5.3 [Data Collection Stage](#)
- 5.4 [Information Date](#)
- 5.5 [Project Identifier](#)
- 5.6 [Enrollment ID](#)
- 5.7 [User Identifier](#)
- 5.8 [Personal ID](#)
- 5.9 [Household ID](#)
- 5.10 [Signed Consent](#)

5.1 Date Created

Header	Instruction
Element Name	Date Created
Field 1 & Response	[date field]
Element Type	Metadata
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Records
Collection Point	Record Creation
System Logic	HMIS auto-generated. HMIS must have the ability to identify the date on which a record was first created in HMIS for any data element. Data elements that are collected together on a single form may share a single Date Created. HMIS users

Header	Instruction
	and system administrators must not have the ability to enter or to modify the information in this Metadata Element.
Other System Issues	The HMIS must store this metadata for all client-level data elements. It is not necessary that this information be displayed in the user interface of the HMIS, but it must be accessible in the programming of reports. Date Created must not change when a data element is edited. If two client records representing the same person are merged, the earliest Date Created must be retained for data elements for which the HMIS stores only one value per client (e.g., name, SSN, date of birth).
XML	XML attribute: DateCreated
CSV	<*><DateCreated> (Field collected across multiple files)
2017 V1 Changes Made	None

5.2 Date Updated

Header	Instruction
Element Name	Date Updated
Field 1 & Response	[date field]
Element Type	Metadata
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Data Elements
Collection Point	Record Add / Edit
System Logic	HMIS auto-generated. Created by the HMIS when a record for any data element is first created, and updated by the HMIS every time the record is saved by an HMIS user
Other System Issues	The HMIS must be able to determine, for all data elements, the date on which it was last edited by a user. Each time a user saves data, the HMIS must store the current date as the Date Updated with the data being saved. Data elements that are collected together on a single form may share a single Date Updated. HMIS users or system administrators must not have the ability to enter or to modify the information in this metadata element.
XML	XML attribute: DateUpdated
CSV	<*><DateUpdated> (Field collected across multiple files)
2017 V1 Changes Made	None

5.3 Data Collection Stage

Header	Instruction
Element Name	Data Collection Stage
Field 1 & Response	Data Collection Stage
1	Project start
2	Project update
5	Project annual assessment

Header	Instruction
3	Project exit
6	Post exit
Element Type	Metadata
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Data Elements with multiple data collection stages
Collection Point	Client Data Entry of Specified Elements
System Logic	<p>HMIS auto-generated or HMIS user selected.</p> <p>An HMIS must be able to distinguish between data collected at project start, project update (during a project stay), and at project exit.</p> <p>Data elements that are collected together on a single form may share a single Data Collection Stage.</p> <p>HMIS users should not have the ability to create more than one record per data element at either project start or project exit (e.g., for a single project stay, a client should have one and only one record of Income and Sources identified as project start).</p> <p>The system must allow a user to save a dated record for a client's annual assessment as an "annual assessment".</p>
Other System Issues	<p>The response categories correlate to response categories defined in the XML and CSV specifications.</p> <p>An "annual assessment" is required as noted in the collection stage for some Program Specific Elements. The Annual Assessment must include updating both the head of household's record and any other family members at the same time.</p> <p>Elements for which a collection point of 'annual assessment' is required must be collected at least once annually for each client. An Annual Assessment must occur between months 11 and 13 annually for all HUD funded projects. The <i>Information Date</i> must be no more than 30 days before or after the anniversary of the head of household's <i>Project Start Date</i>; information must be accurate as of the <i>Information Date</i>. The date range of the Annual Assessment is based entirely around the head of household's <i>Project Start Date</i>, not on the date of the client's or head of household's previous assessment. For all projects which require an annual assessment, data collected as part of an annual assessment must have a <i>Data Collection Stage</i> of 'annual assessment.' There should be one and only one record for each data element with a <i>Data Collection Stage</i> of 'annual assessment' within the 60-day period surrounding the anniversary of the head of household's <i>Project Start Date</i>. Regardless of whether or not the responses have changed since project start or the previous annual assessment, a new record must be created for each annual assessment such that it is possible to view a history, by date, of the values for each data element.</p>
XML	XML attribute: DataCollectionStage
CSV	<*><DataCollectionStage> (Field collected across multiple files)

Header	Instruction
2017 V1 Changes Made	Project update was clarified in the Data Element Structure section of this document. A Post Exit stage has been added.

5.4 Information Date

Header	Instruction
Element Name	Information Date
Field 1 & Response	[date field]
Element Type	Metadata
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	As Specified in Data Element Definitions
Collection Point	Client Program-Specific Data Entry
System Logic	<p>This Metadata Element is a hybrid in that it pertains to the client data and not directly to the client, but it will be entered in HMIS by users.</p> <p>Throughout the Data Dictionary this Metadata Element has been added to the data elements where it applies (e.g. Income and Sources, with Response 1 Information Date). The metadata element is included here to provide further information for HMIS vendors and system administrators.</p> <p>Data that is collected only at initial HMIS project start (e.g., Name, Social Security Number) does not require an Information Date.</p> <p>Data that is collected only at project start or only at project exit, may be assumed to have an Information Date that matches the Project Start Date or Project Exit Date, respectively or an HMIS may require that a user specify the date.</p> <p>Data elements that are collected together on a single form may share a single Information Date.</p>
Other System Issues	This Metadata Element is applicable to all elements which can change over time.
XML	XML attribute: InformationDate
CSV	<*><InformationDate> (Field collected across multiple files)
2017 V1 Changes Made	None

5.5 Project Identifier

Header	Instruction
Element Name	Project Identifier

Project Type Applicability	All HMIS Project Types

Header	Instruction
Data Collected About	Specified Data Elements
Collection Point	Record Add / Edit
System Logic	<p>HMIS auto-generated or HMIS user selected.</p> <p>Data elements that are collected together on a single form may share a single Project Identifier. In order to report on data quality on a project's report, it is first necessary to establish that the project in question was responsible for the data.</p>
Other System Issues	This is a basic requirement that assumes a simple relationship between clients and projects. In circumstances where one project may be responsible for entering data that would appropriately appear on another project's required report (e.g., a central intake point), it may be necessary to create a more sophisticated method to establish responsibility for the data entered.
XML	Unique Identifier: ProjectID
CSV	<*><ProjectID> (Field collected across multiple files)
2017 V1 Changes Made	None

5.6 Enrollment ID

Header	Instruction
Element Name	Enrollment ID
Field 1 & Response	A unique project start identifier used to associate data with a particular period of service.
Element Type	Metadata
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Enrollment Level Data
Collection Point	Record Add
System Logic	<p>HMIS auto-generated.</p> <p>The data element should be created by the HMIS at the time that the record of a project start is first entered into HMIS, and should be stored with any data that pertains to that particular period of service.</p> <p>Data elements that are collected together on a single form may share a single Project Identifier. An HMIS should be able to correlate data to a specific project stay.</p>
Other System Issues	This metadata element must be stored with all elements identified in this document as having a collection point "Project Start"
XML	Unique Identifier: EnrollmentID
CSV	<*><EnrollmentID> (Field collected across multiple files)
2017 V1 Changes Made	Renamed from 5.6 Project Entry ID

5.7 User Identifier

Header	Instruction
Element Name	User Identifier
Field 1 & Response	A unique ID used to associate data with the user who entered and/or edited it

Header	Instruction
Element Type	Metadata
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Records
Collection Point	All Data Entry
System Logic	<p>HMIS generated.</p> <p>Each authorized user of an HMIS must have a unique identifier stored in the HMIS. Every time data is entered or edited in HMIS, the HMIS must keep a record of which user entered or edited the data based on the credentials supplied at the time of login.</p> <p>The data element should be stored with any Universal or Program-Specific Data Element entered or edited in an HMIS.</p>
Other System Issues	<p>It must be possible to determine, for all client-level data, which user entered it in HMIS. Each time a user saves data, the HMIS must store the User Identifier of that particular user with the data being saved.</p> <p>Data elements that are collected together on a single form may share a single User Identifier.</p> <p>HMIS users must not have the ability to enter or to modify the information in this Metadata Element.</p> <p>If a data element is edited, the system must retain the original value, along with the User Identifier of the user who entered it, in addition to storing the new value and the User Identifier of the editing user.</p>
XML	XML attribute: UserID
CSV	<*><UserID> (Field collected across multiple files)
2017 V1 Changes Made	None

5.8 Personal ID

Header	Instruction
Element Name	Personal ID
Field 1 & Response	Personal ID (HMIS Generated)
Element Type	Metadata
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Record Creation
System Logic	<p>Generate one. A Personal ID is an automatically generated identifier created by the HMIS application. A Personal ID must be permanent and unique to a single individual within an HMIS implementation.</p> <p>A Personal ID must be created, but there is no required format if there is a single unique Personal ID for every client and it contains no personally identifying information.</p>
Other System Issues	The Personal ID must be able to be attached to the same individual when served by multiple projects.

Header	Instruction
	<p>There is a one-to-one relationship between Personal ID and 3.1 Name, 3.2 Social Security Number, 3.3 Date of Birth, 3.4 Race, 3.5 Ethnicity, 3.6 Gender, and 3.7 Veteran Status.</p> <p>Search functionality must exist to facilitate linkage of the same person with their Personal ID as they are served by different projects within the continuum. There are multiple ways to accomplish this. The recommended method of search by users for clients in open record systems is for users to enter a combination of personal identifying information (Name, SSN, Date of Birth, and/or Gender) into the HMIS application and have the application search for matching records. If a match is found and a Personal ID is retrieved, the same Personal ID will be assigned to the client, i.e. the same record is used. If no matches are found, a new automatically generated Personal ID is assigned to the client. Variations or other methods may also be utilized by vendors if the system is designed to mitigate duplicate record entry.</p> <p>HMIS must have functionality to allow the HMIS Lead to de-duplicate multiple records with distinct Personal ID's that are identified as representing the same individual based on identifying information.</p>
XML	<Client><PersonalID>
CSV	Client
2017 V1 Changes Made	<p>Renumbered – formerly 3.13 and repositioned as Metadata</p> <p>No change but clarification on one-to-one relationship necessary</p>

5.9 Household ID

Header	Instruction
Element Name	Household ID
Field 1 & Response	Household ID (HMIS Generated)
Element Type	Metadata
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Project Start
System Logic	<p>A Household ID will be assigned to each household at each project start and applies for the duration of that project stay to all members of the household served.</p> <p>The Household ID must be automatically generated by the HMIS application to ensure that it is unique. The Household ID has no meaning beyond a single enrollment; it is used in conjunction with the Project ID, Project Start Date, and Project Exit Date to link records for household members together and indicate that they were served together.</p> <p>The Household ID is to be unique to the household stay in a project; reuse of the identification for the same or similar household upon readmission into the project is unacceptable.</p>
Other System Issues	Persons may join a household with members who have already begun a project start or may leave a project although other members of the household remain

Header	Instruction
	<p>in the project. A common Household ID must be assigned to each member of the same household. Persons in a household (either adults or children) who are not present when the household initially applies for assistance and later join the household should be assigned the same Household ID that links them to the rest of the persons in the household. The early departure of a household member would have no impact on the Household ID.</p> <p>An HMIS may, but is not required to, utilize a Global Household ID at record creation upon initial entry into an HMIS based on the person(s) presenting together as a household at the time of initial entry. A Global Household ID is a value which spans an entire HMIS implementation representing a collection of persons who have been in a household together. Assignment of a client in or out of a global household at a specific project need not immediately affect the client's data at other projects. If, for example, one household member exits from a household in project A and that household is also being served in project B, there is no requirement to alter the household configuration at project B.</p>
XML	<Enrollment><HouseholdID>
CSV	Enrollment
2017 V1 Changes Made	Renumbered – formerly 3.14 and repositioned as Metadata

5.10 Signed Consent

Header	Instruction
Element Name	Signed Consent
Field 1 & Response	Signed Consent (HMIS Generated)
Element Type	Universal
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Project Start
System Logic	This is a placeholder metadata element. HUD and the federal partners have determined that client level consent is required to SHARE data (not to collect the data) in an HMIS. Logically then data transfer requires information to be able to be submitted or omitted from some types of transfer dependent on consent. HUD will implement a process by which to consider the issues both technical and legal related to data transfer, but is placing this item in the metadata to have HMIS Vendors recognize the need and begin to consider how it will need to be implemented within their own system and considering their diverse user base.
Other System Issues	None
XML	<Enrollment><Consent>
CSV	Enrollment
2017 V1 Changes Made	NEW

REQUIRED COLLECTION POINTS AND METADATA ELEMENTS TABLE SUMMARY

Required Collection Points

Users must be able to enter each data element at the appropriate point in time, as identified in each individual data element definition and summarized in the table below.

Data Elements with Multiple Collection Points

- Data elements with multiple collection points must be recorded with 5.3 *Data Collection Stage*.
- There may be no more than one record per *Enrollment ID* of any multiple-point data element with a *Data Collection Stage* of ‘project start’ or ‘project exit.’
- Users must be able to create a theoretically infinite number of records per *Enrollment ID* with a data collection stage of ‘update’ or ‘annual assessment’ for multiple-point data elements.

Data Elements with a Single Collection Point

- Data elements with a single collection point may be recorded with 5.3 *Data Collection Stage*, but it is not required.
- There may be no more than one record per *Enrollment ID* of any data element collected only at project start, only at project exit, or only post-exit.
- Users must be able to create a theoretically infinite number of records per *Enrollment ID* for single-point data elements with a plain ‘X’ in the ‘Update / Occurrence Point’ column in the table below.
- There may be no more than one record per *Enrollment ID* for single-point data elements with ‘X (0...1)’ in the ‘Update / Occurrence Point’ column in the table below.

Base Metadata

5.1 *Date Created*, 5.2 *Date Updated*, and 5.7 *User Identifier* are not shown in the table below; these base metadata elements are required for every data element. Data elements collected on a single form / stored as fields in one record of a table may share a single set of this base metadata as long as the data elements, as they are defined by this Dictionary, are collected at the same point.

Example 1: Personal ID, SSN, Date of Birth, Race, Ethnicity, Gender, Veteran Status, and Veteran Information all exist at the same level / have a one-to-one relationship with one another. They may share a Date Created, Date Updated, and User ID.

Example 2: Project Start Date and Project Exit Date both have a one-to-one relationship with Enrollment ID, but have different collection points. In order to evaluate timeliness of data entry, Project Start Date and Project Exit Date must have separate base metadata elements.

Project Identifier, Personal ID, and Household ID

Because 3.10 *Project Start Date* initiates an enrollment, the creation of this data element is assumed to also create 5.6 *Enrollment ID*. Along with the *Enrollment ID*, *Project Start Date* must also be associated with 5.5 *Project Identifier*, 5.8 *Personal ID*, and 5.9 *Household ID*. The relationship of each of these metadata elements to *Enrollment ID* is one-to-one. Every record for any enrollment-related data element (e.g., every data element requiring *Enrollment ID*) is associated with a single project, client, and household through the *Enrollment ID*.

DE	Element	Collection Points						Required Metadata Elements	
		Record Creation	Project Start	Update/Occurrence Point	Annual Assessment	Project Exit	Post -Exit	Enrollment ID	Data Collection Stage
3.1	Name	X							
3.2	Social Security Number	X							
3.3	Date of Birth	X							
3.4	Race	X							
3.5	Ethnicity	X							
3.6	Gender	X							
3.7	Veteran Status	X							
3.8	Disabling Condition		X					X	
3.10	Project Start Date ³		X					X	
3.11	Project Exit Date					X		X	
3.12	Destination					X		X	
3.15	Relationship to Head of Household		X					X	
3.16	Client Location		X	X				X	X
3.20	Housing Move-In Date			X (0...1)				X	
3.917	Living Situation (A) and (B)		X					X	
4.2	Income and Sources		X	X	X	X		X	X
4.3	Non-Cash Benefits		X	X	X	X		X	X
4.4	Health Insurance		X	X	X	X		X	X
